

Instalación Debian 12

Paso 1 - Nueva Máquina (Botón superior izquierdo)

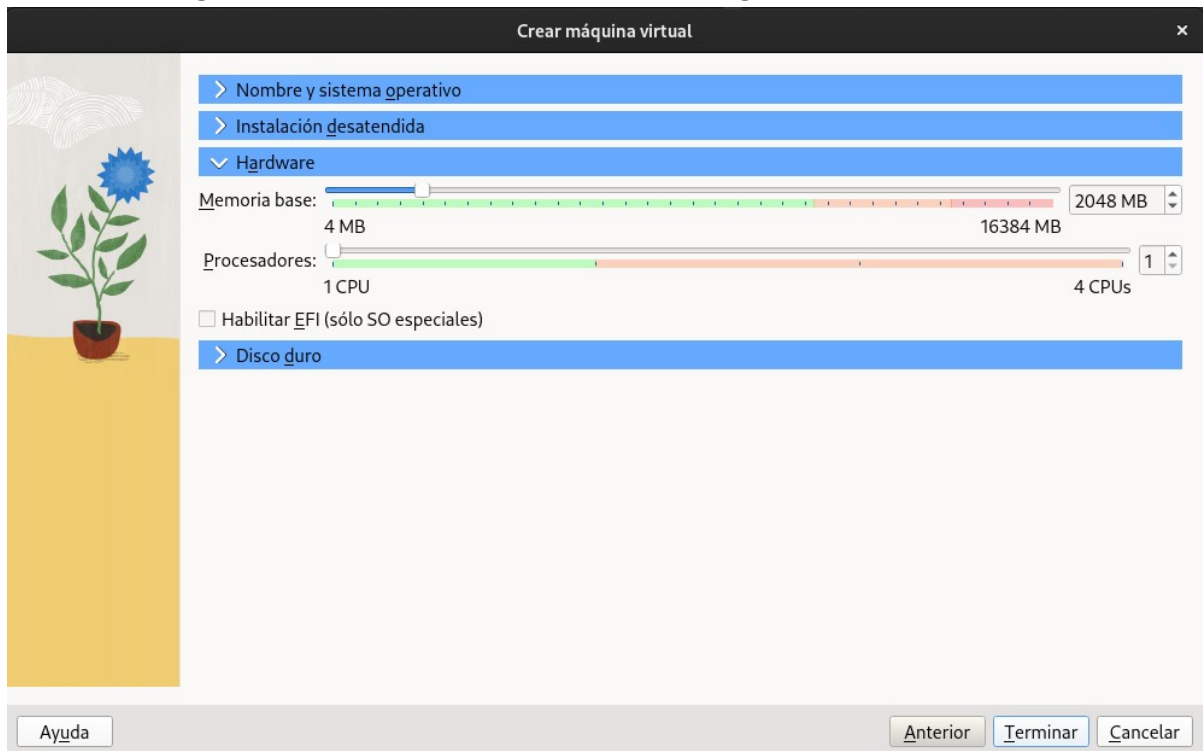

Paso 2 - Información básica de la nueva VM

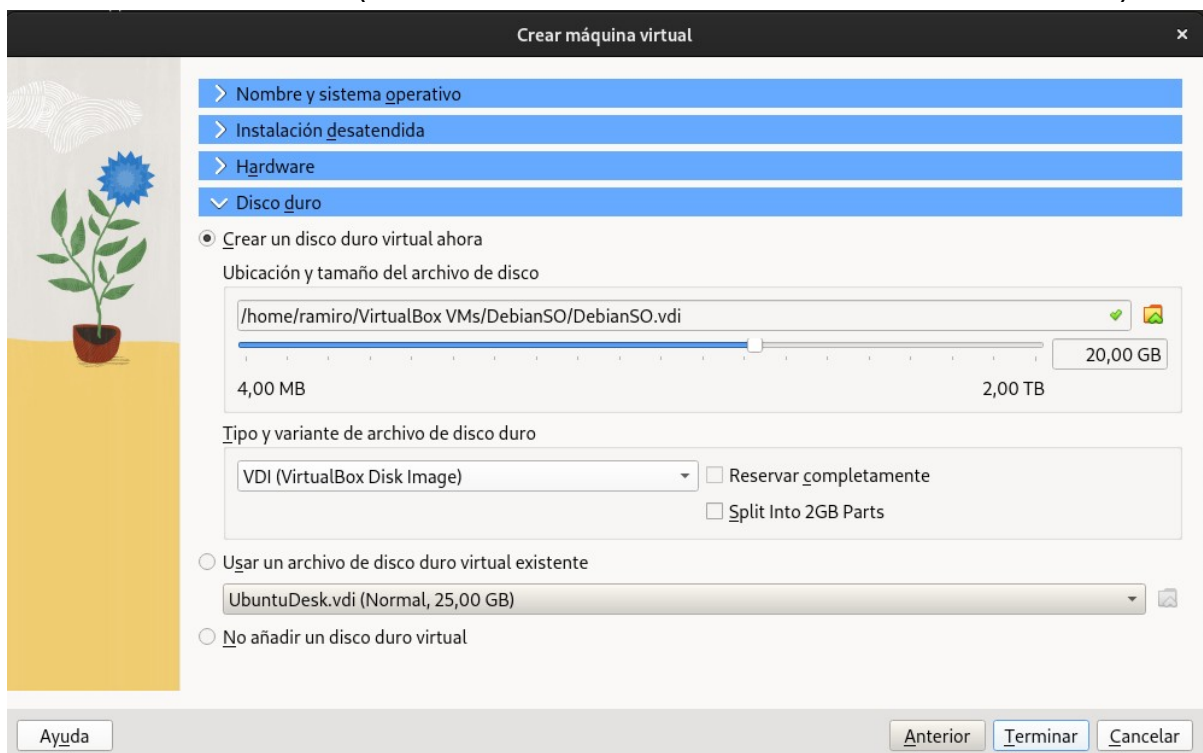

Simplemente es un nombre definido a gusto y el sistema operativo a instalar (esto sólo afecta las recomendaciones que el virtualbox nos hace sobre los recursos a destinar). No olvidar tildar omitir instalación desatendida.

Paso 3 - Asignación de RAM (de usar interfaz gráfica se debería aumentar)

Paso 4 - Nuevo Disco (SE RECOMIENDA DE 16 a 20 GB ACORDE A DISPONIBILIDAD)

Paso 5 - Ir a configuración (settings) en la barra superior

Nueva Añadir Configuración Descartar Iniciar				
Sistema				
Memoria base: 2048 MB				
Procesadores: 2				
Orden de arranque: Disquete, Óptica, Disco duro				
Aceleración: Paginación anidada, Paravirtualización KVM				
Pantalla				
Memoria de vídeo: 16 MB				
Controlador gráfico: VMSVGA				
Servidor de escritorio remoto: Inhabilitado				
Grabación: Inhabilitado				
Almacenamiento				
Controlador: IDE				
Dispositivo IDE secundario 0: [Unidad óptica] debian-12.9.0-amd64-DVD-1.iso (3,71 GB)				
Controlador: SATA				
Puerto SATA 0: DebianSO.vdi (Normal, 20,00 GB)				
Audio				
Controlador de anfitrión: Predeterminado				
Controlador: ICH AC97				
Red				
Adaptador 1: Intel PRO/1000 MT Desktop (NAT)				
USB				
Controlador USB: OHCI, EHCI

Ninguno				

Paso 6 - De ser posible habilitar las opciones siguientes

Basic	Expert	Search settings
Sistema		
Placa base Procesador Aceleración		
Interfaz de paravirtualización: Predeterminado		
Hardware de virtualización: ☒ Habilitar paginación anidada		
Cancelar Aceptar		

Paso 7 - Configuración para PuTTY (Opcional)

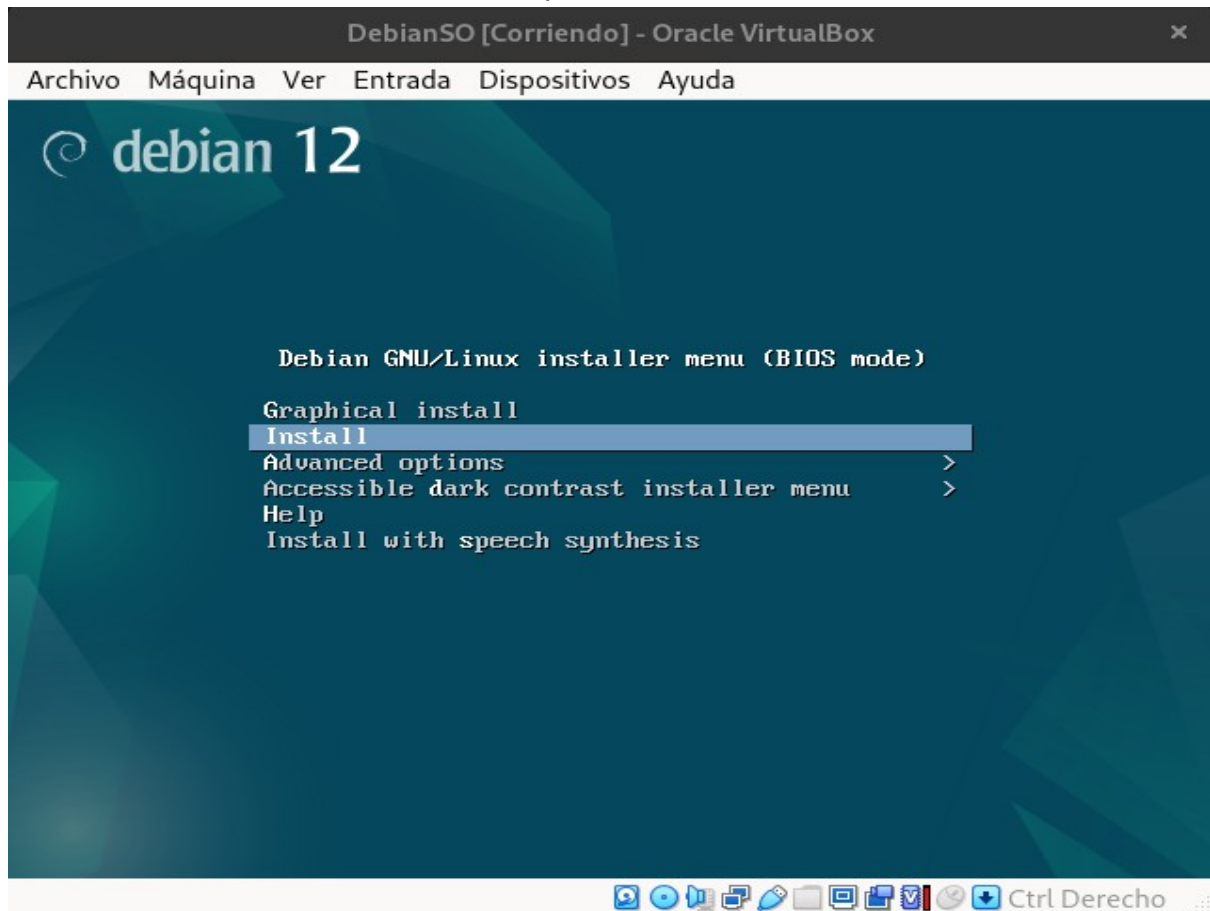

The image shows two screenshots of the MikroTik WinBox interface. The top screenshot displays the 'Red' (Network) settings for 'Adaptador 1'. The 'Habilitar adaptador de red' checkbox is checked. The 'Conectado a' dropdown is set to 'NAT'. The 'Tipo de adaptador' dropdown is set to 'Intel PRO/1000 MT Desktop (82540EM)'. The 'Modo promiscuo' dropdown is set to 'Denegar'. The 'Dirección MAC' field contains '08002712FF16'. The 'Cable conectado' checkbox is checked, and the 'Reenvío de puertos' checkbox is also checked.

The bottom screenshot shows the same WinBox interface with a 'Reglas de reenvío de puertos' (Port Forwarding Rules) dialog box open. The dialog box contains a table with the following data:

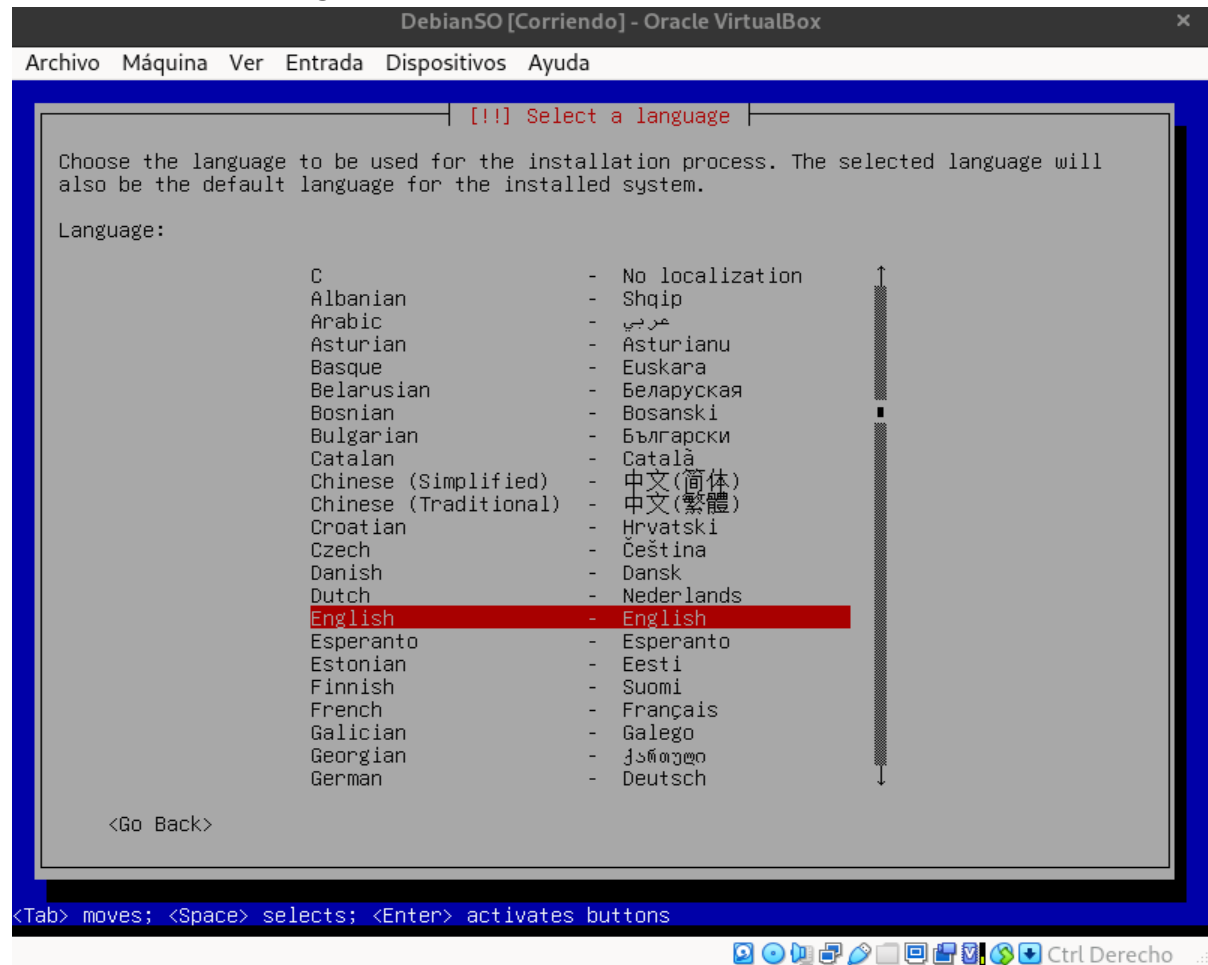

Nombre	Protocolo	IP anfitrión	Puerto anfitrión	IP invitado	Puerto invitado
Rule 1	TCP		8022		22

At the bottom right of the dialog box are 'Cancelar' and 'Aceptar' buttons.

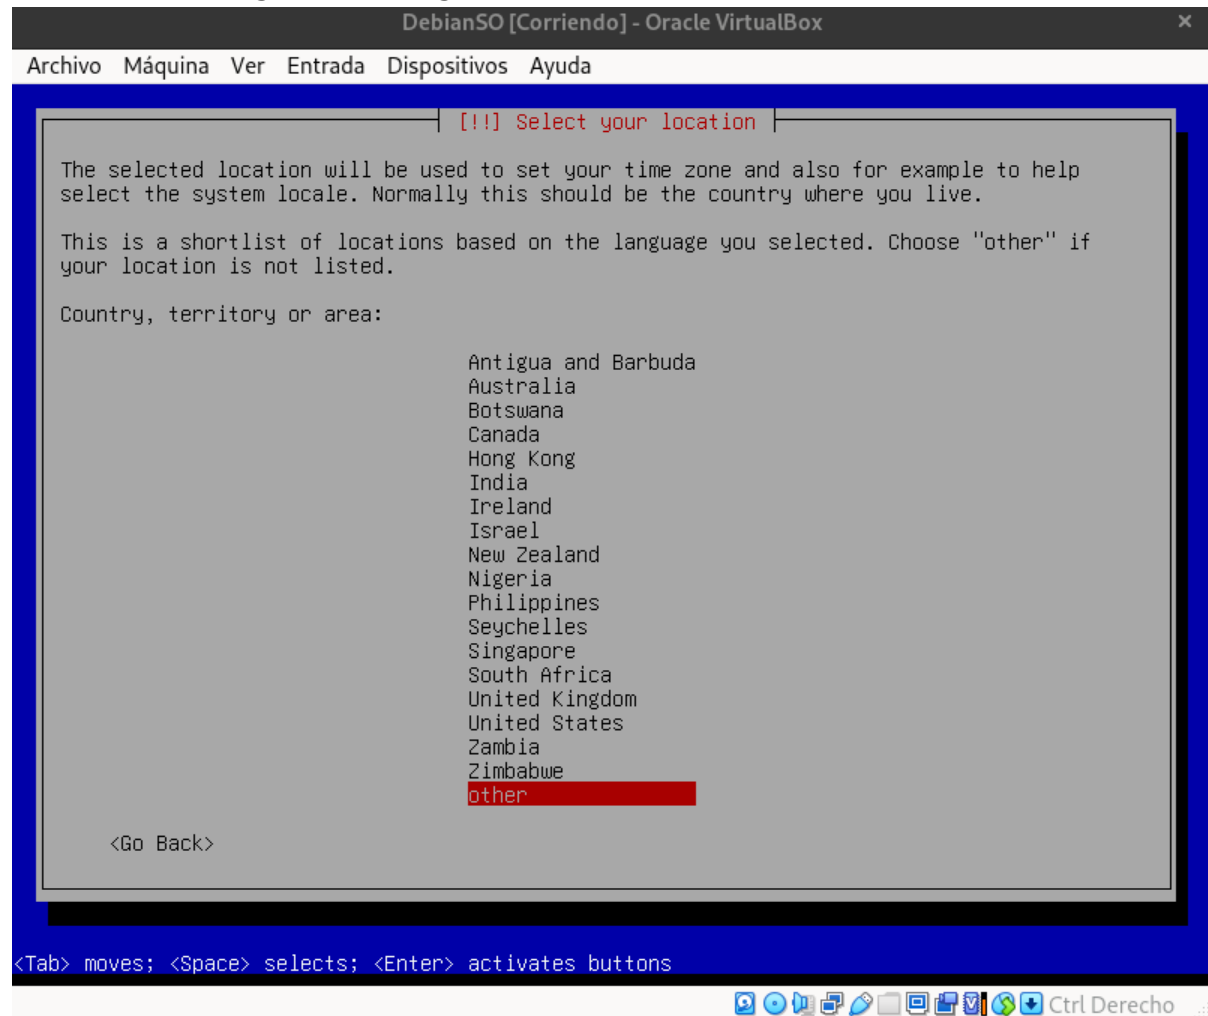

Paso 8 - Instalación del sistema operativo

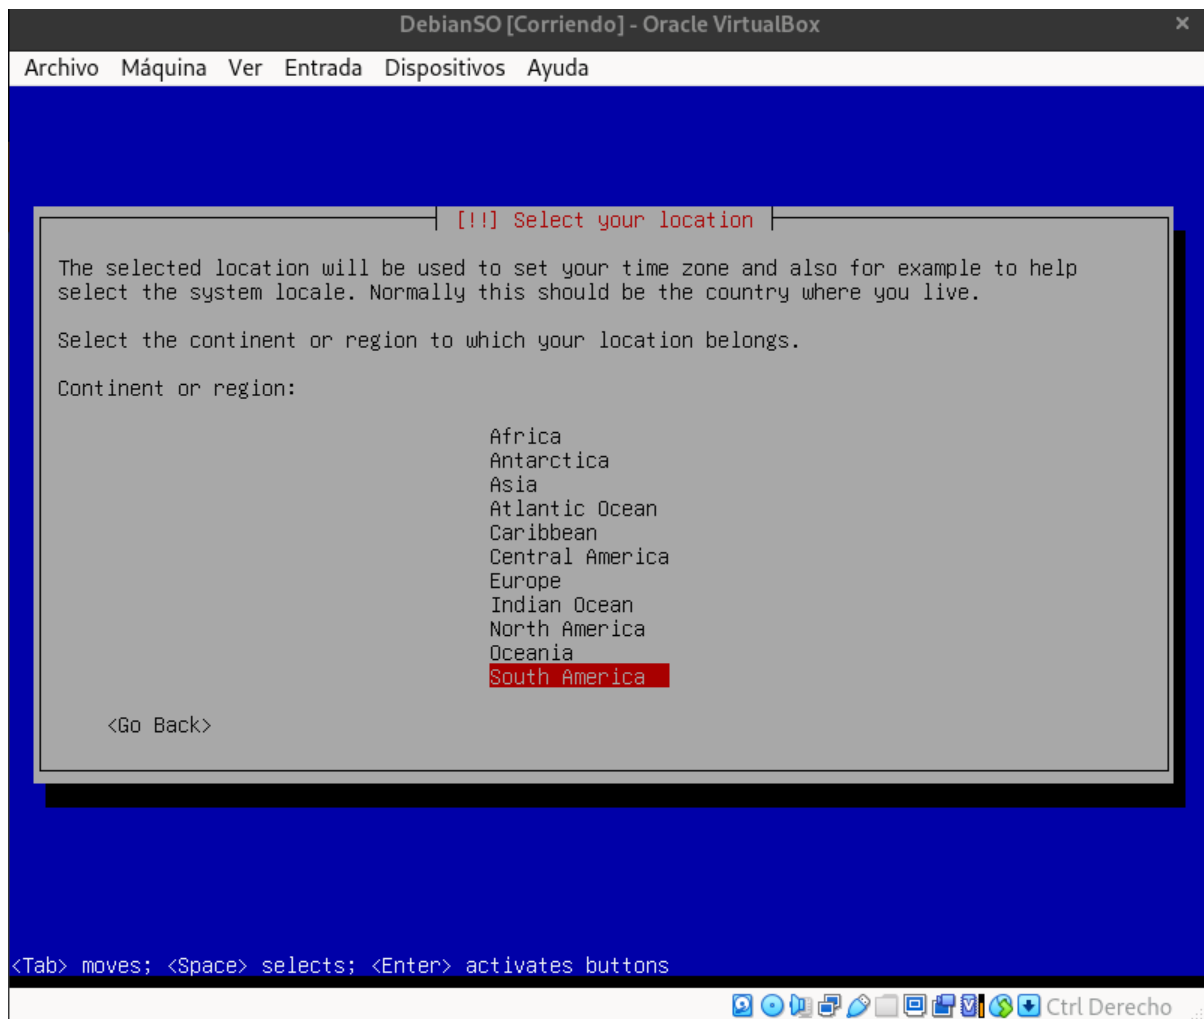

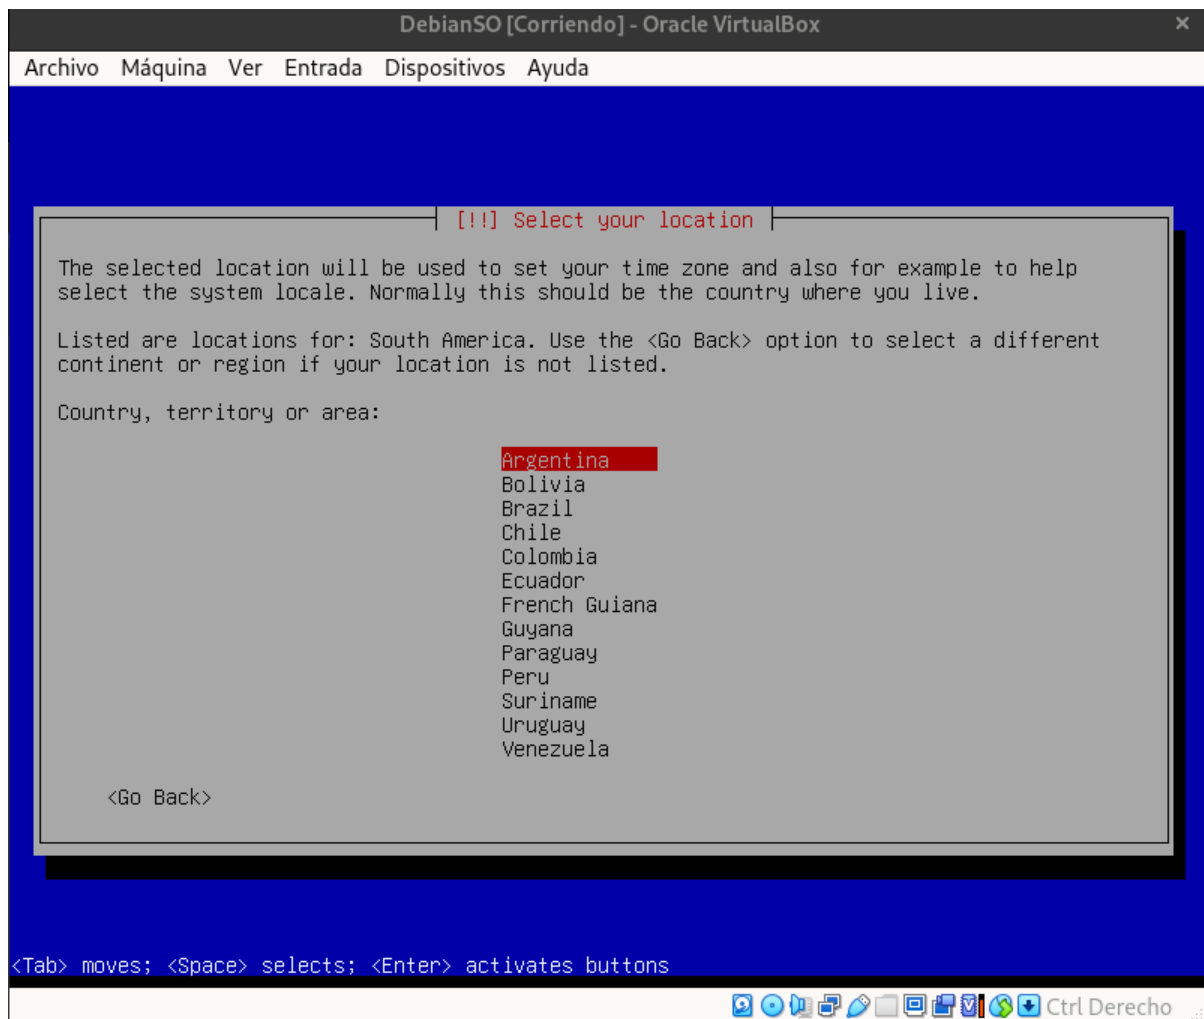

Paso 9 - Idioma (A gusto)

Paso 10 - Configuración regional

[!] Configure locales

There is no locale defined for the combination of language and country you have selected. You can now select your preference from the locales available for the selected language. The locale that will be used is listed in the second column.

Country to base default locale settings on:

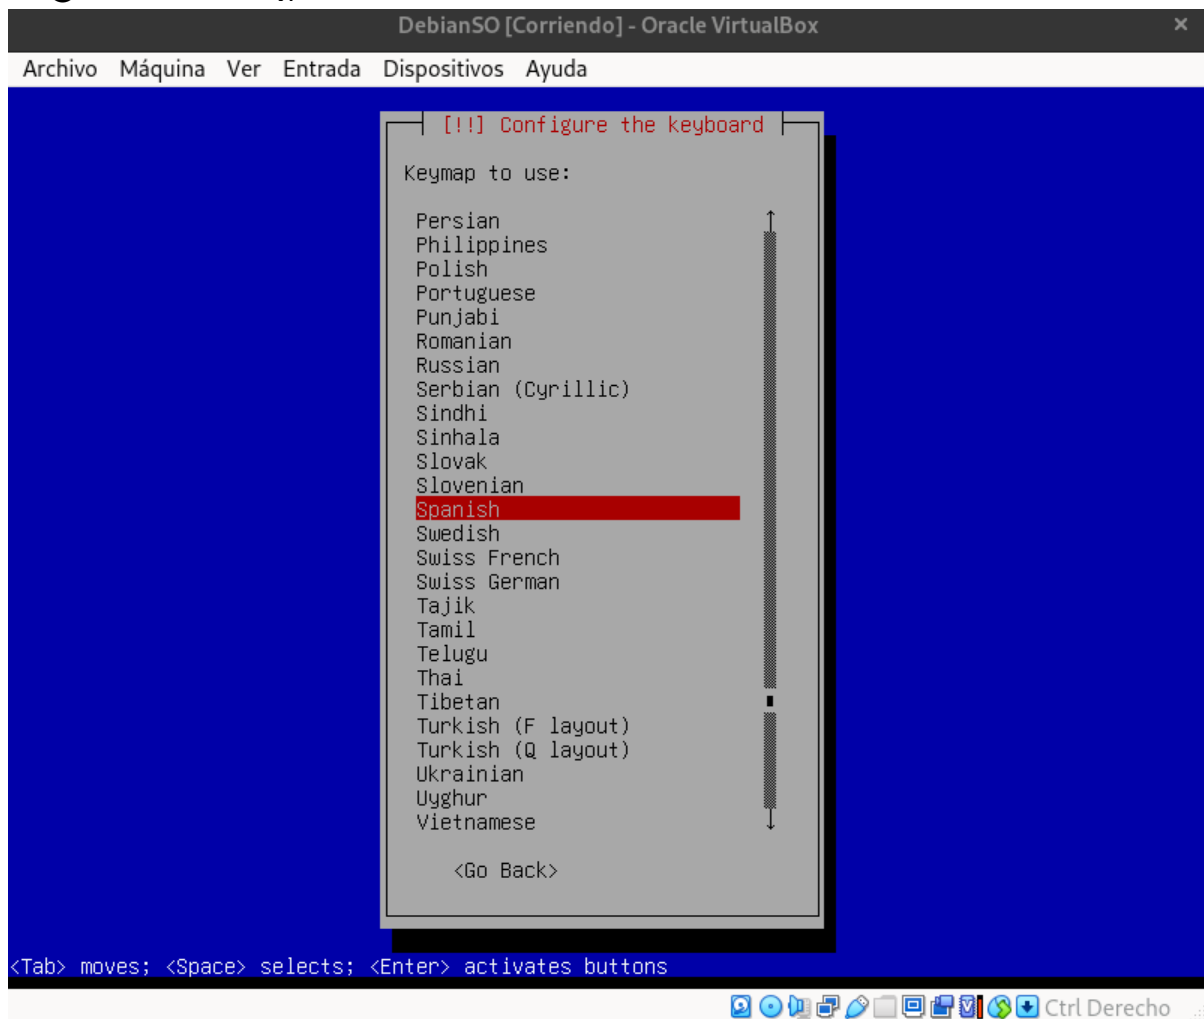

Antigua and Barbuda	- en_AG
Australia	- en_AU.UTF-8
Botswana	- en_BW.UTF-8
Canada	- en_CA.UTF-8
Hong Kong	- en_HK.UTF-8
India	- en_IN
Ireland	- en_IE.UTF-8
Israel	- en_IL
New Zealand	- en_NZ.UTF-8
Nigeria	- en_NG
Philippines	- en_PH.UTF-8
Seychelles	- en_SC.UTF-8
Singapore	- en_SG.UTF-8
South Africa	- en_ZA.UTF-8
United Kingdom	- en_GB.UTF-8
United States	- en_US.UTF-8
Zambia	- en_ZM
Zimbabwe	- en_ZW.UTF-8

<Go Back>

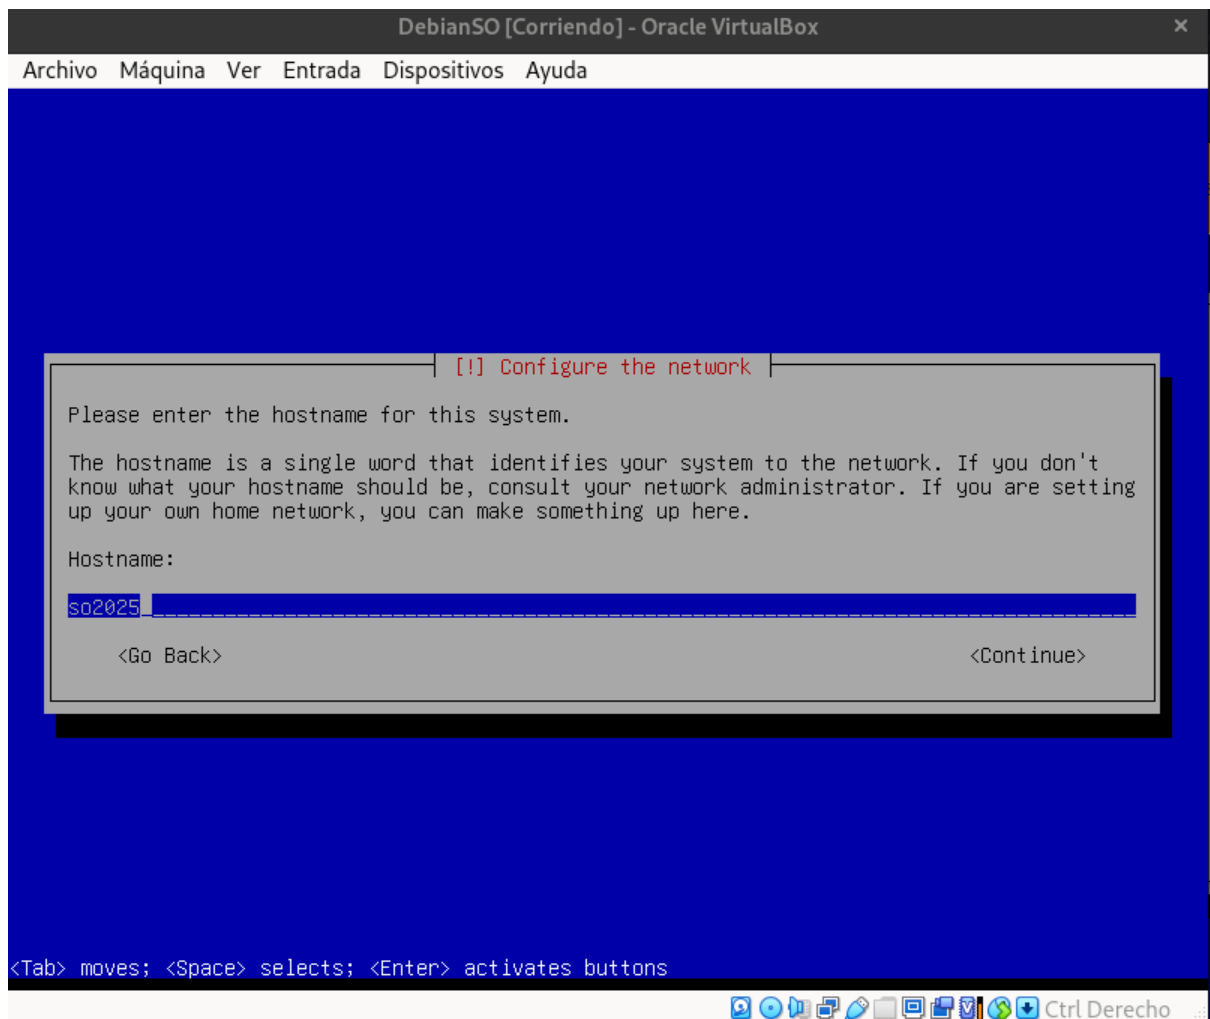

<F1> for help; <Tab> moves; <Space> selects; <Enter> activates buttons

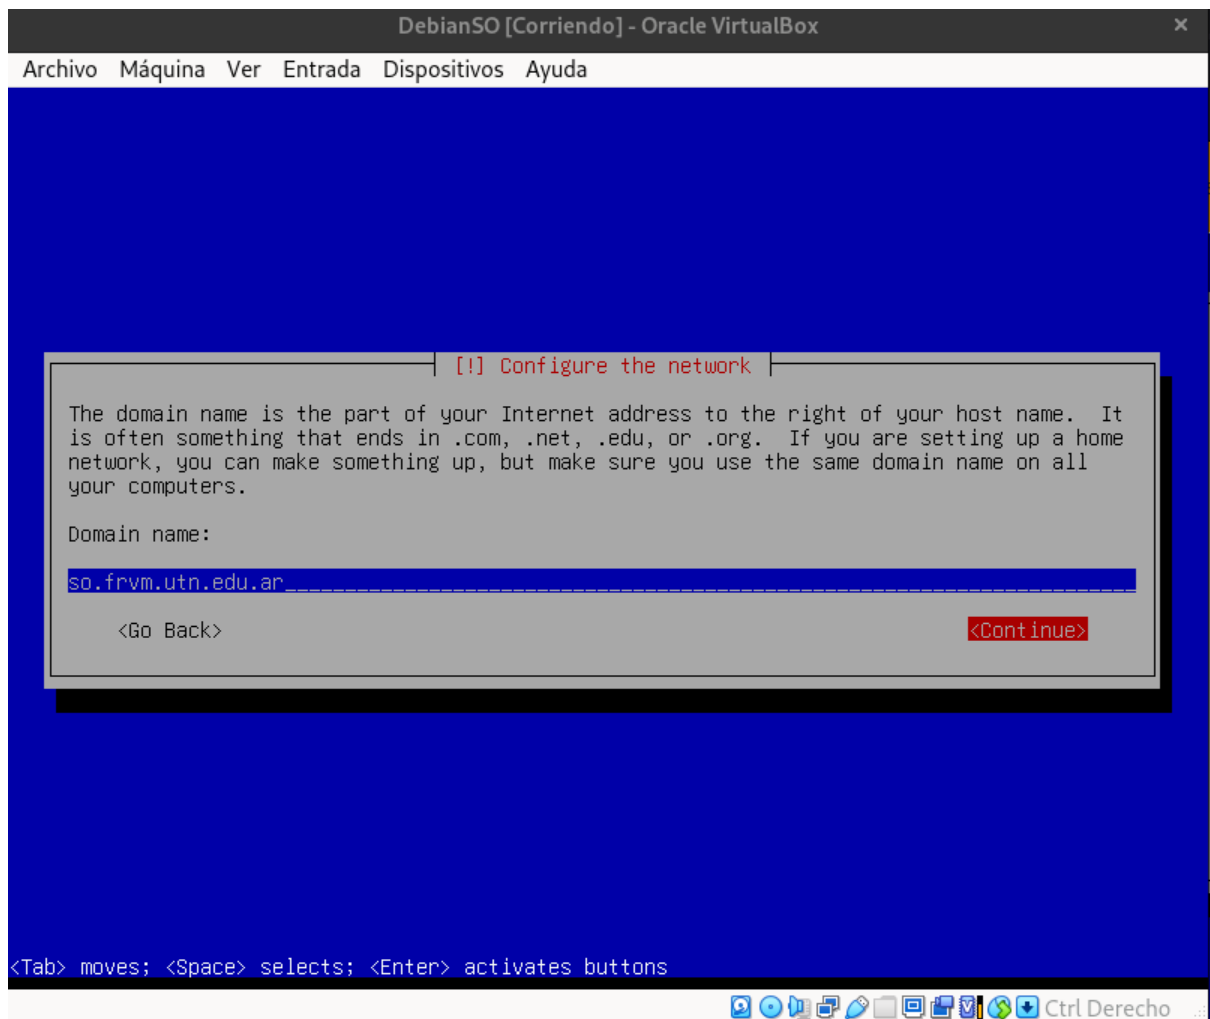

Ctrl Derecho

Paso 11 - Teclado (Español con el @ en el número 2 y latinoamericano con el @ en la letra Q)

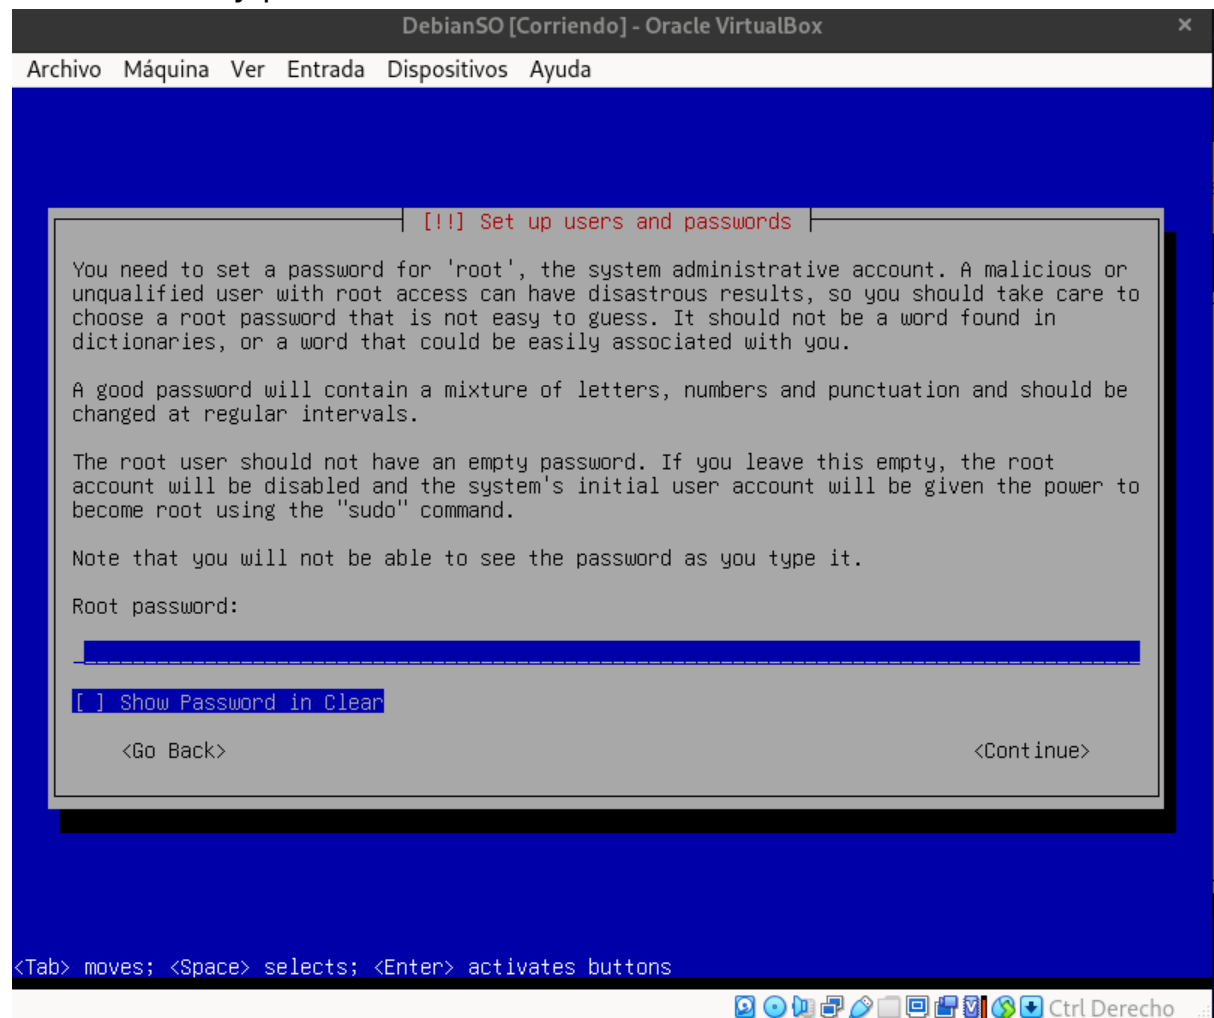

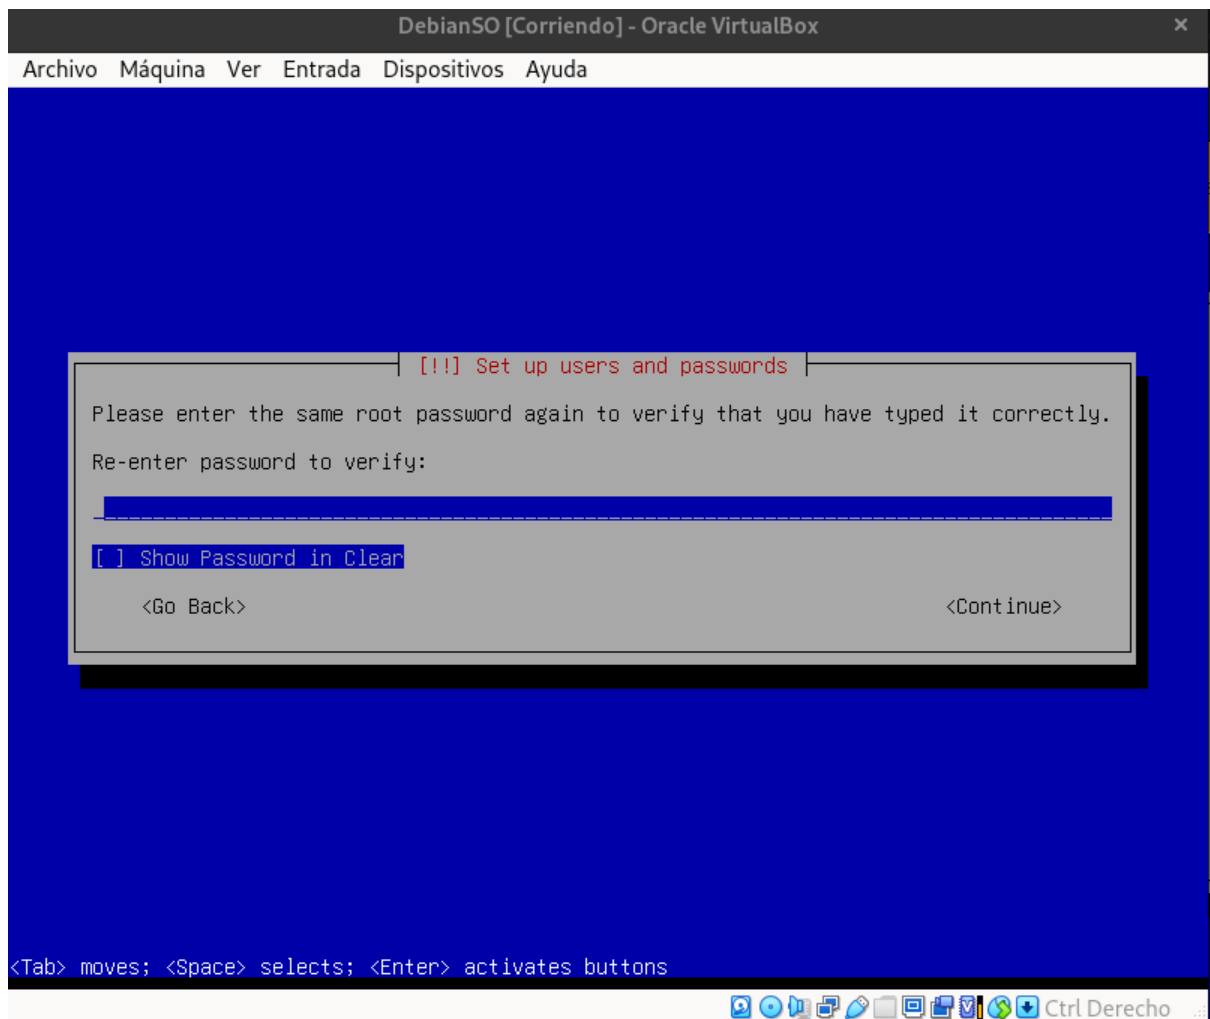

Paso 12 - Nombre del sistema operativo y de dominio (A gusto)

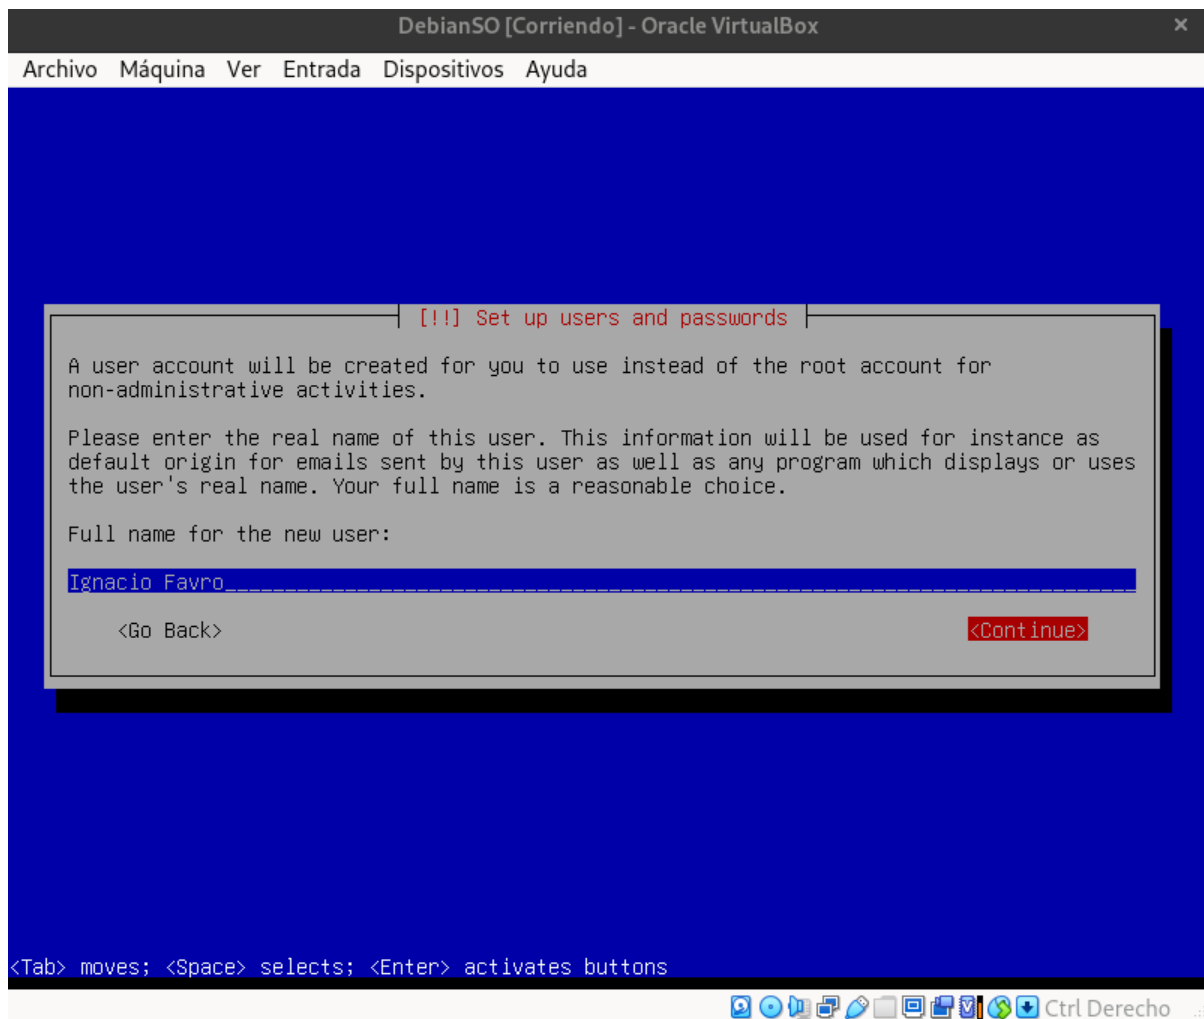

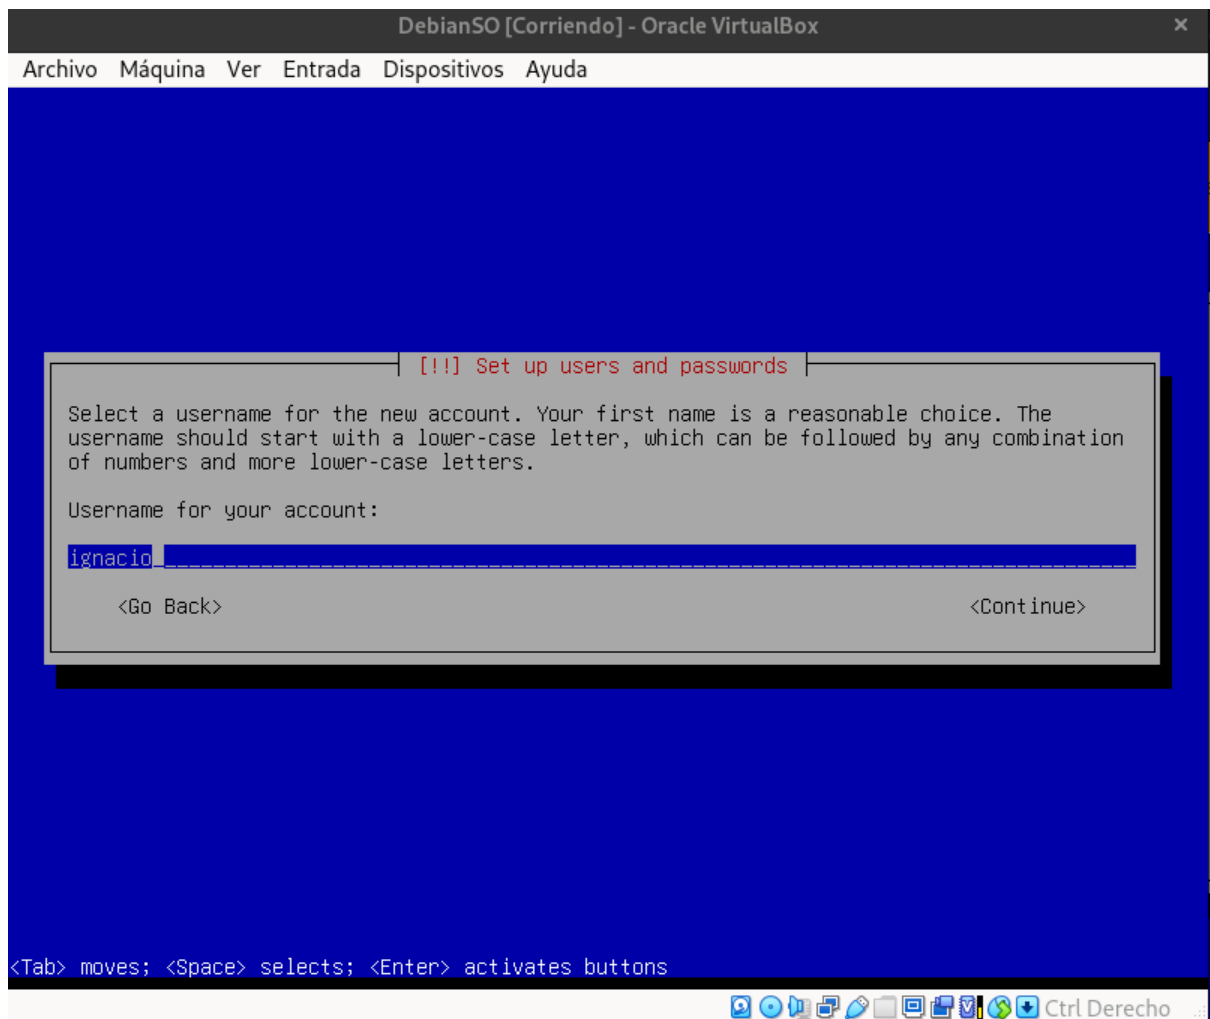

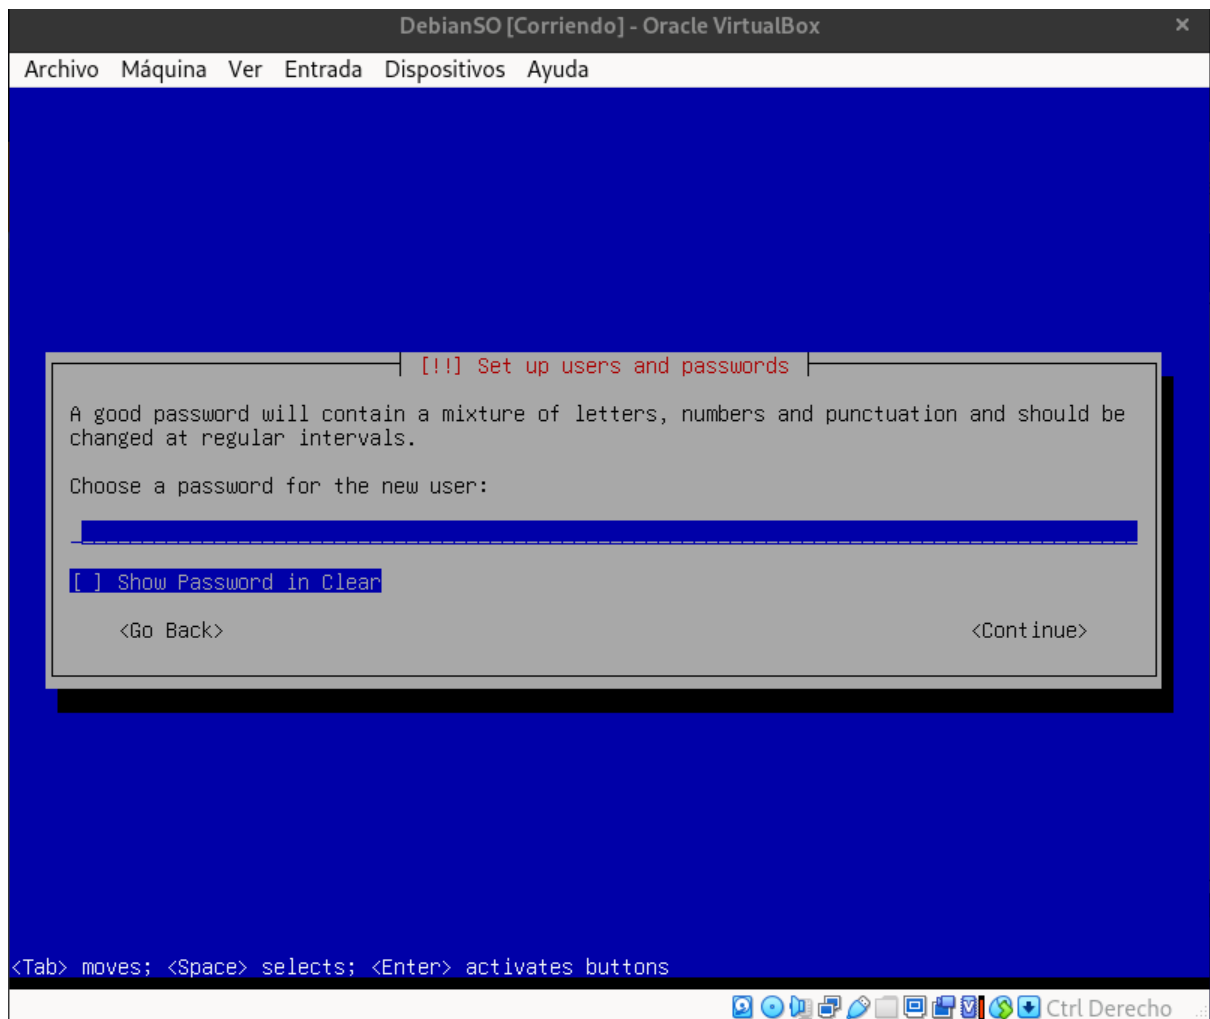

13 - Usuarios y password

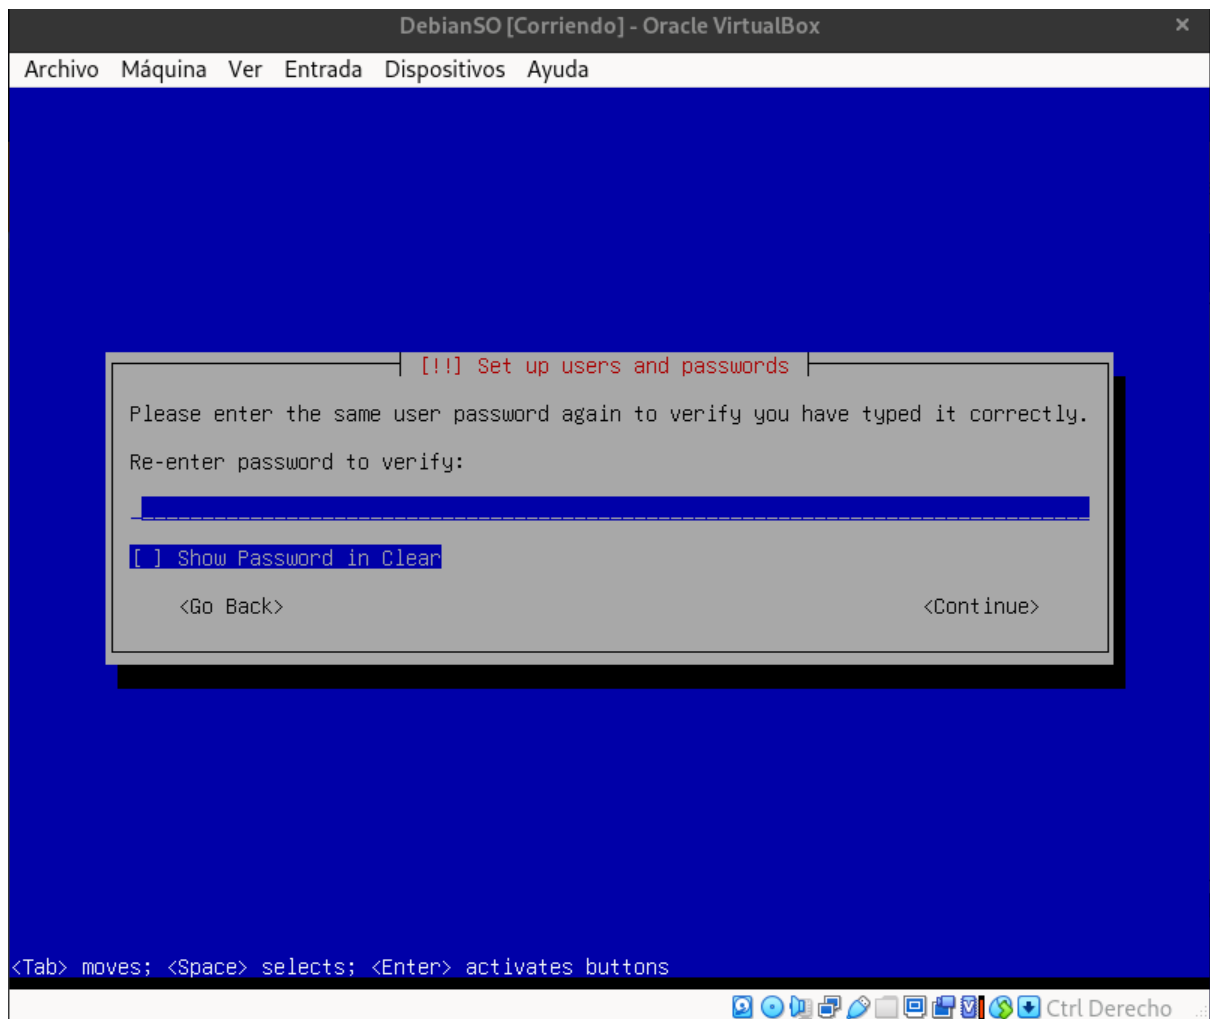

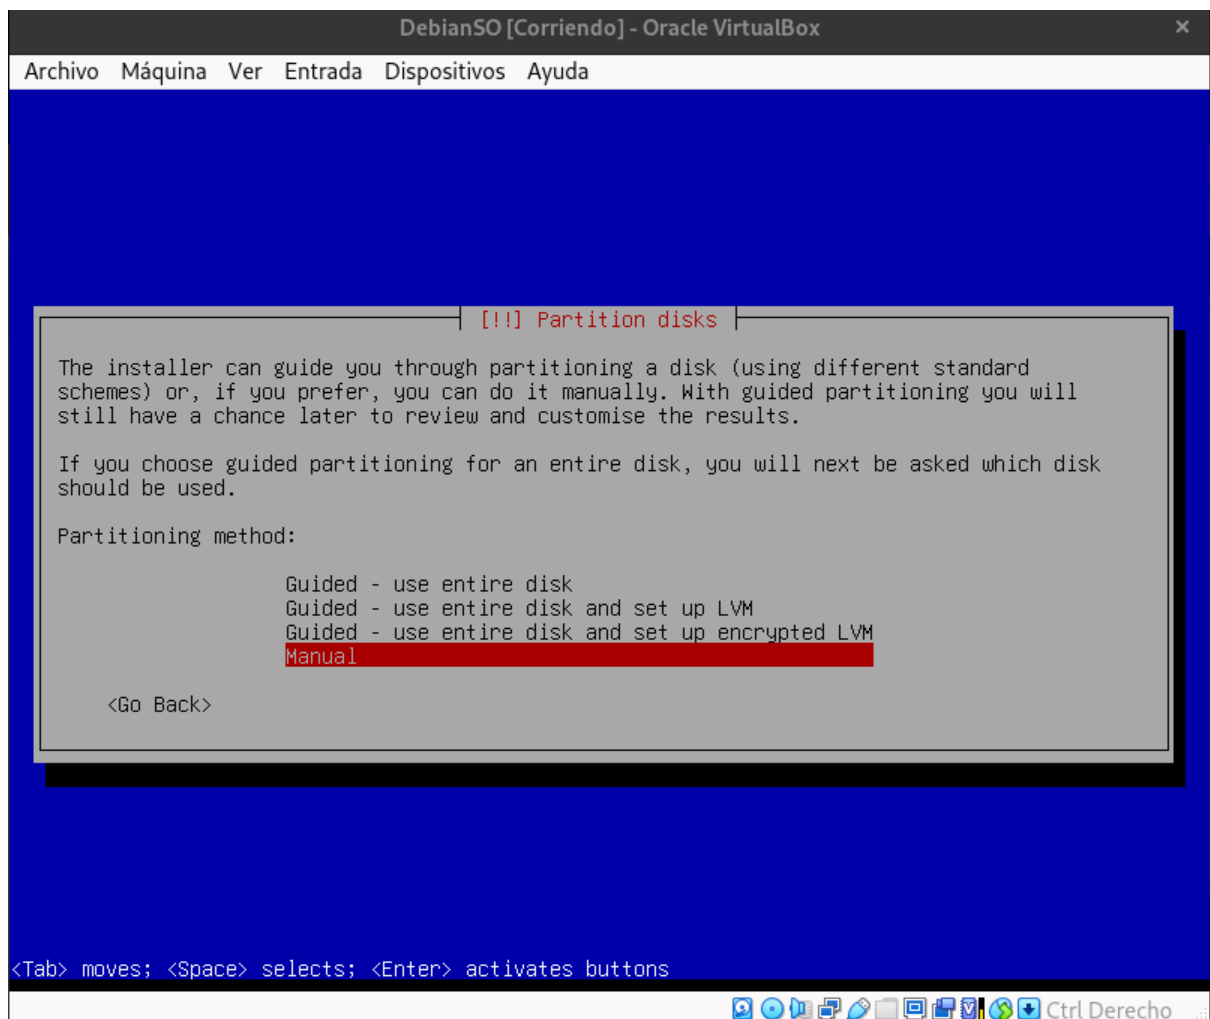

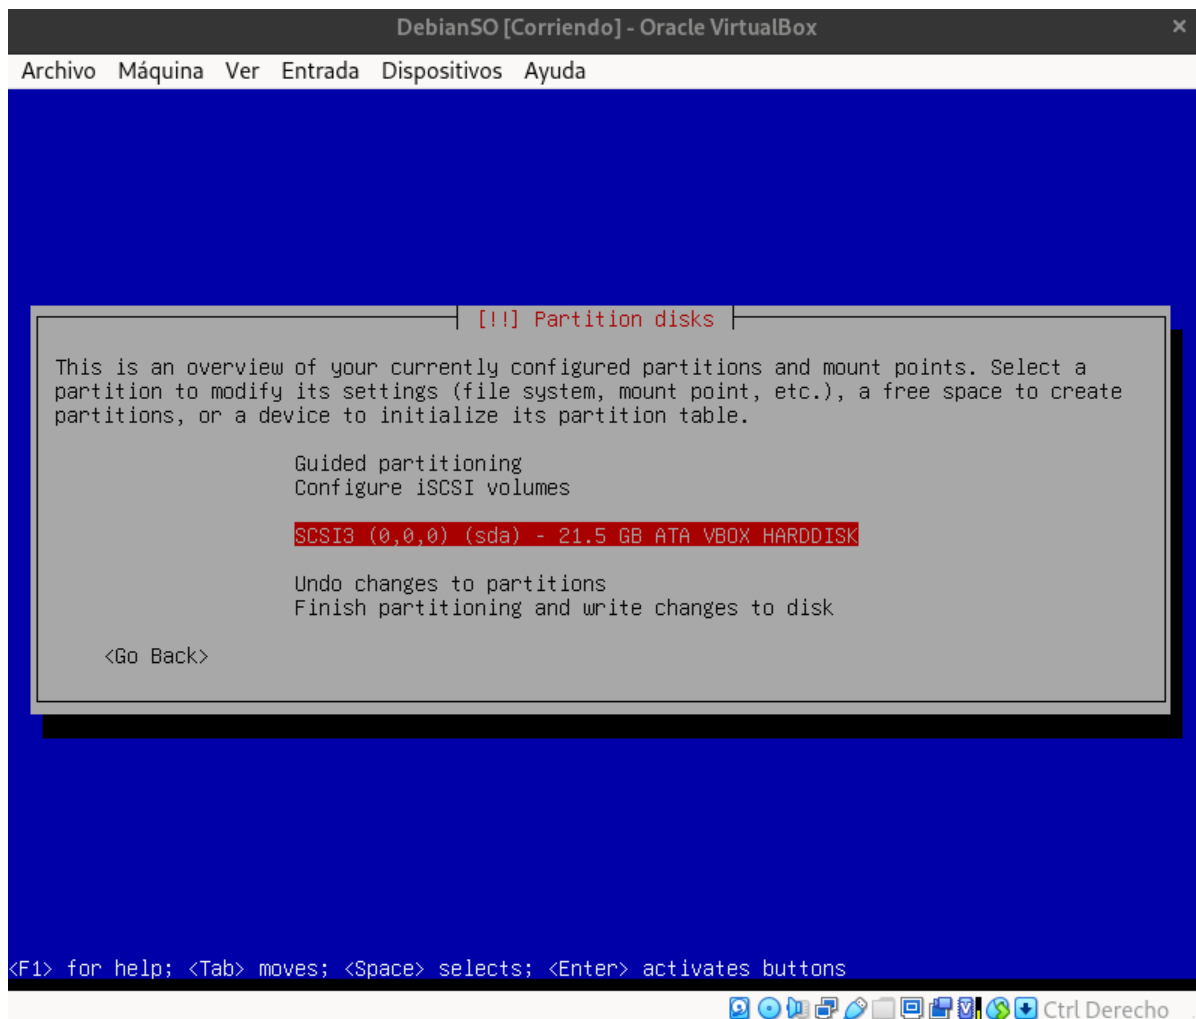

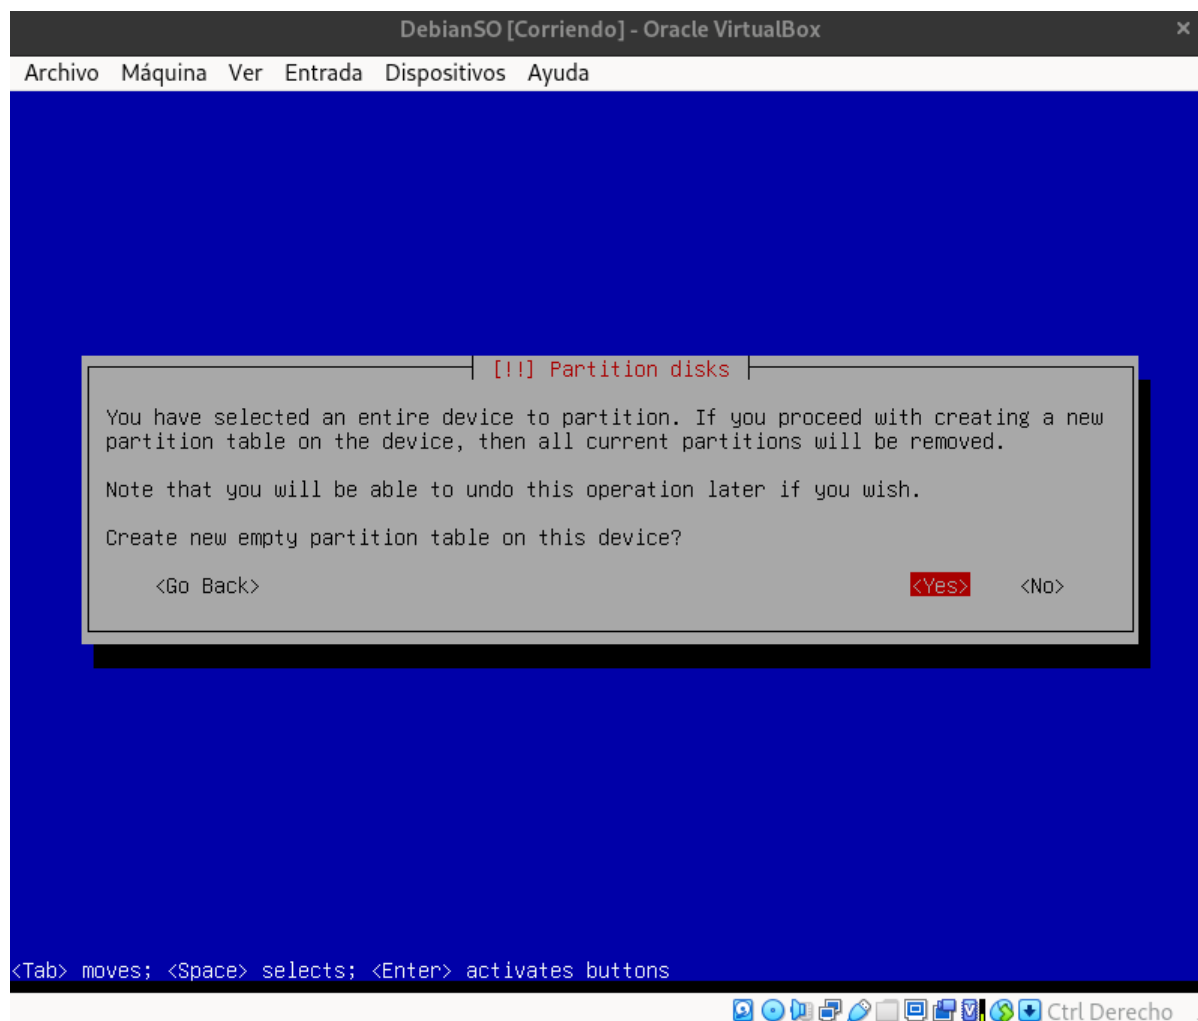

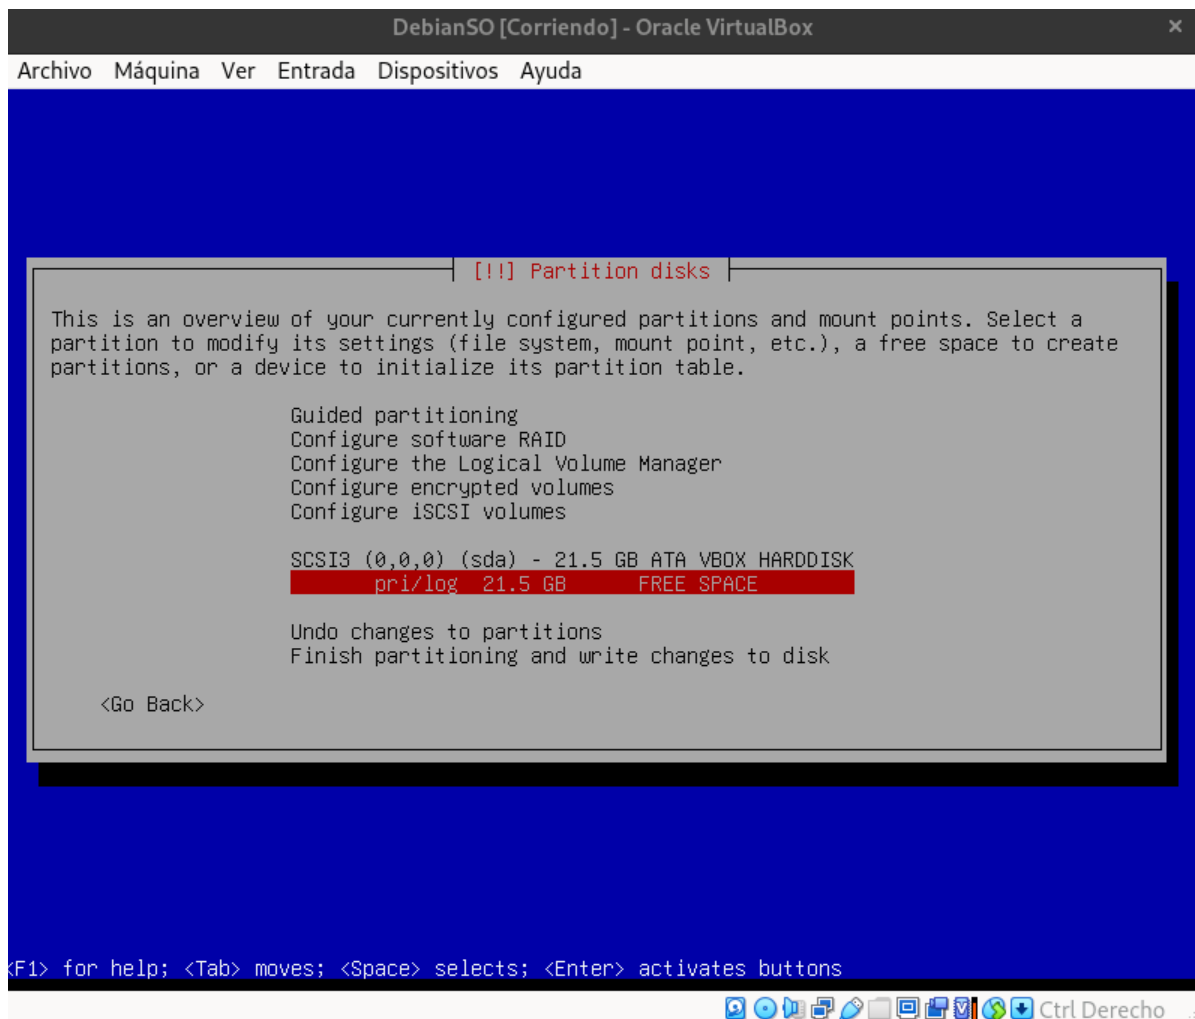

14 - Particionamiento de Disco

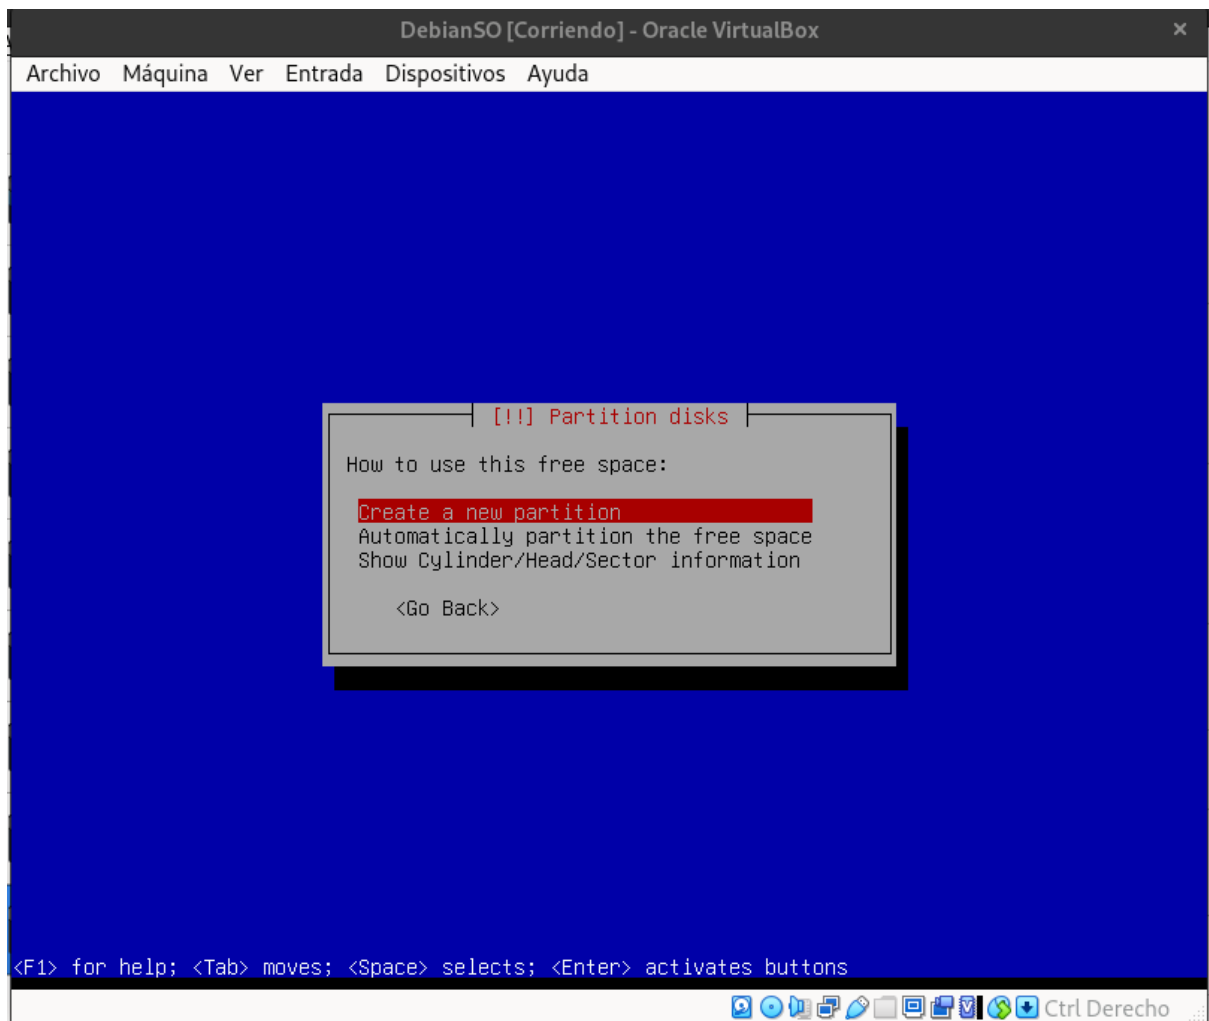

Para este paso vamos a usar la opción Manual, pero es importante analizar el particionado en profundidad y el sistema de archivo utilizado

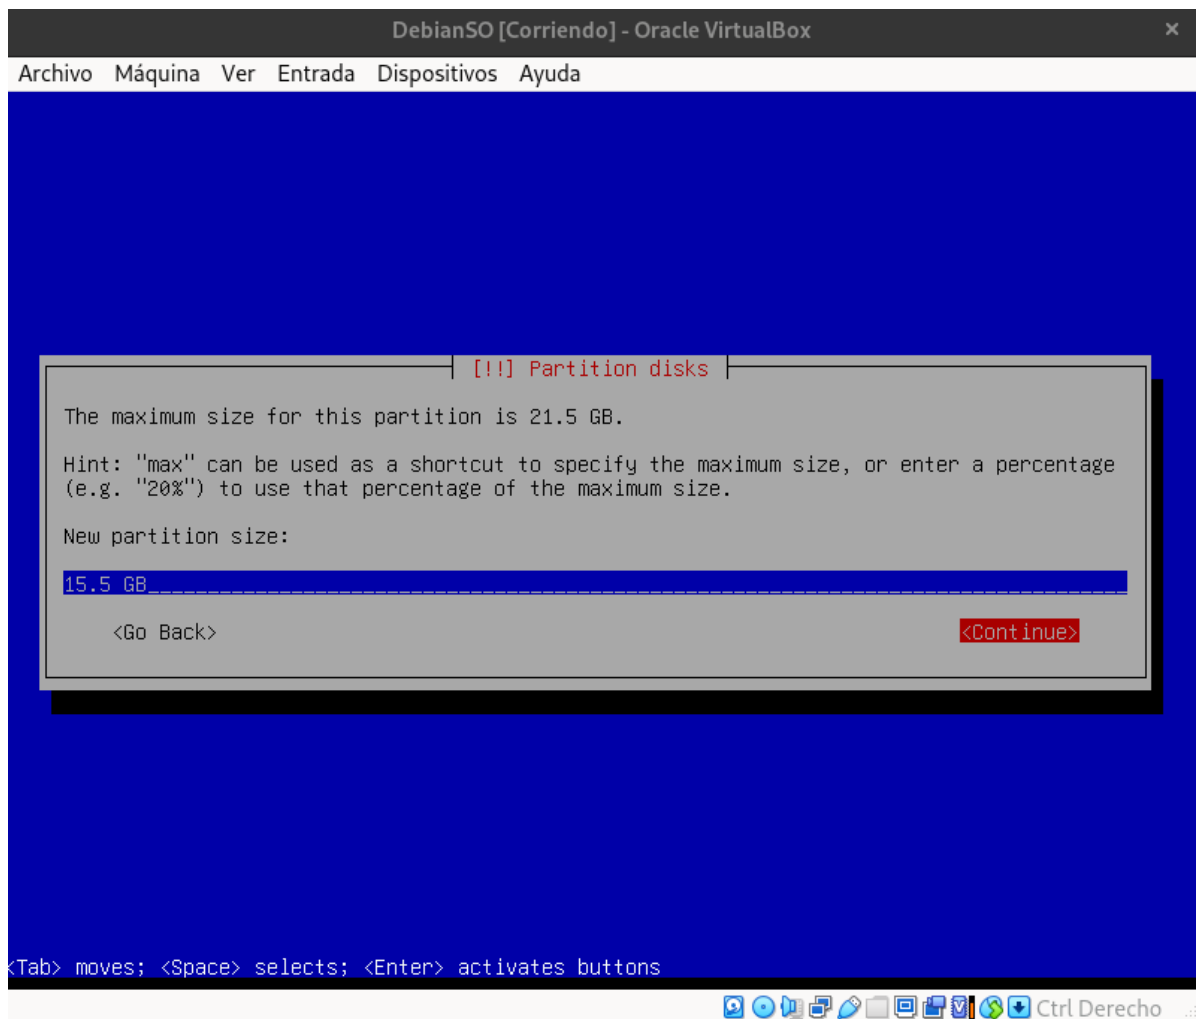

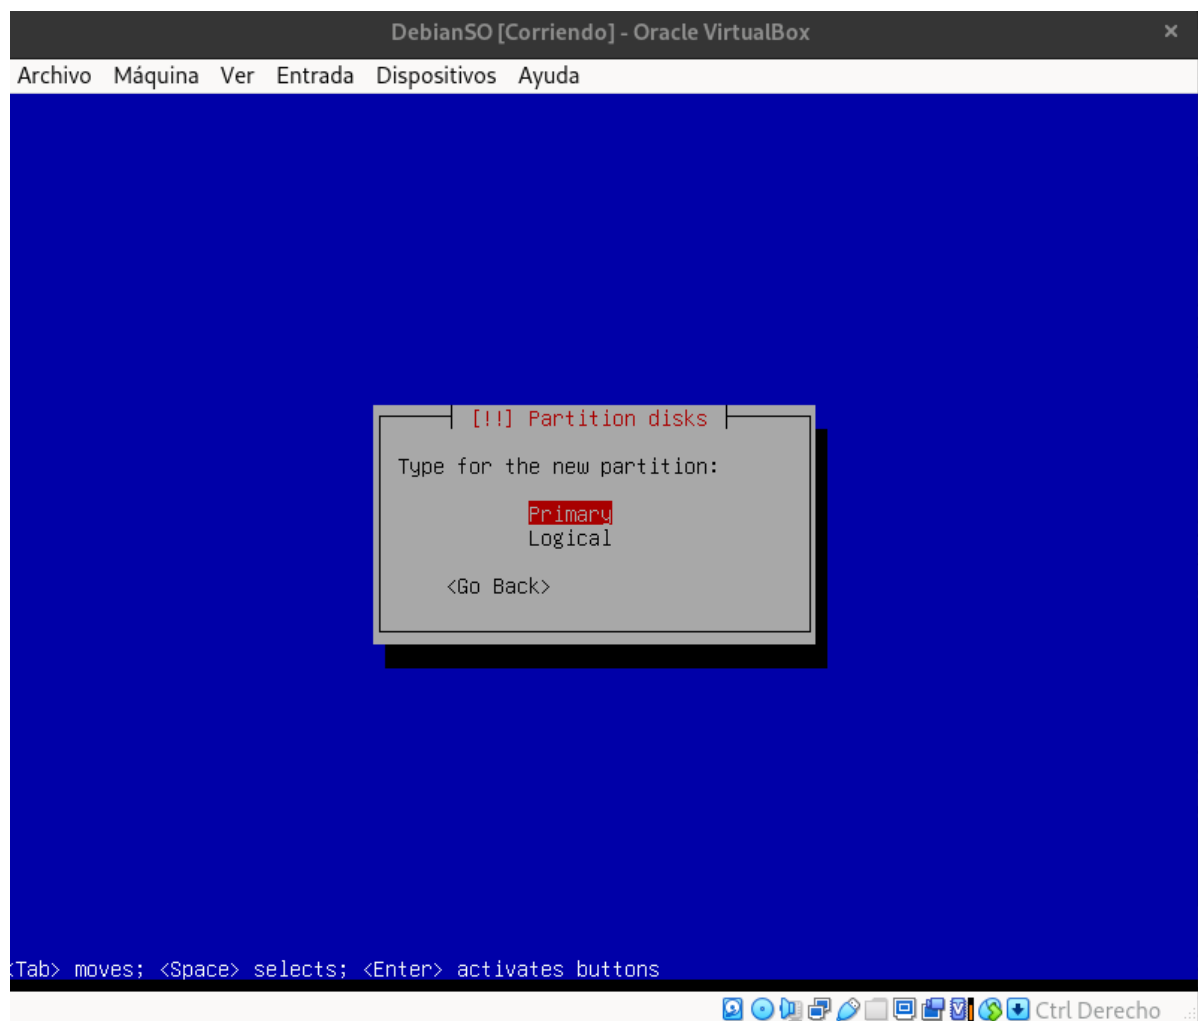

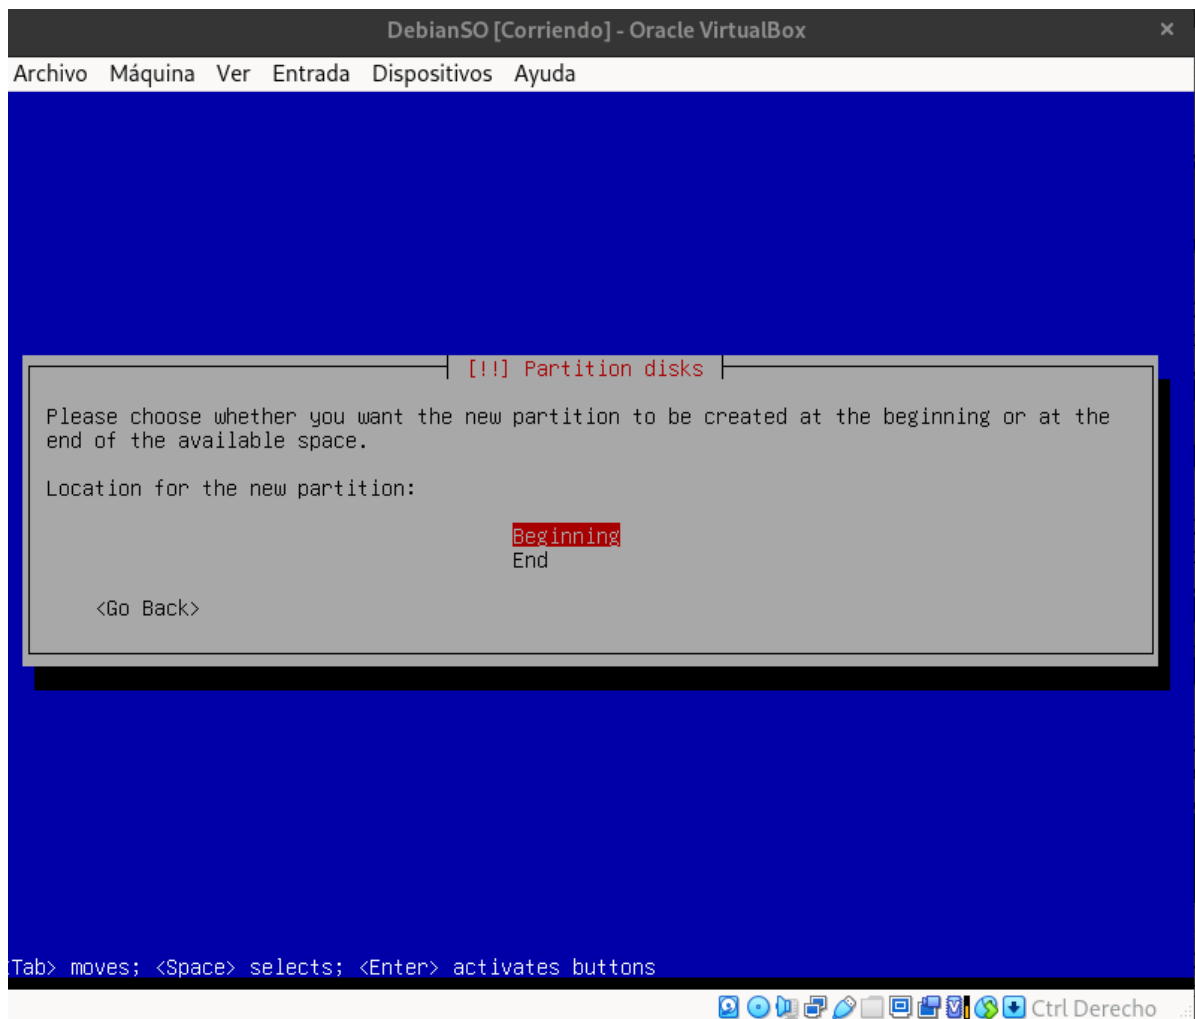

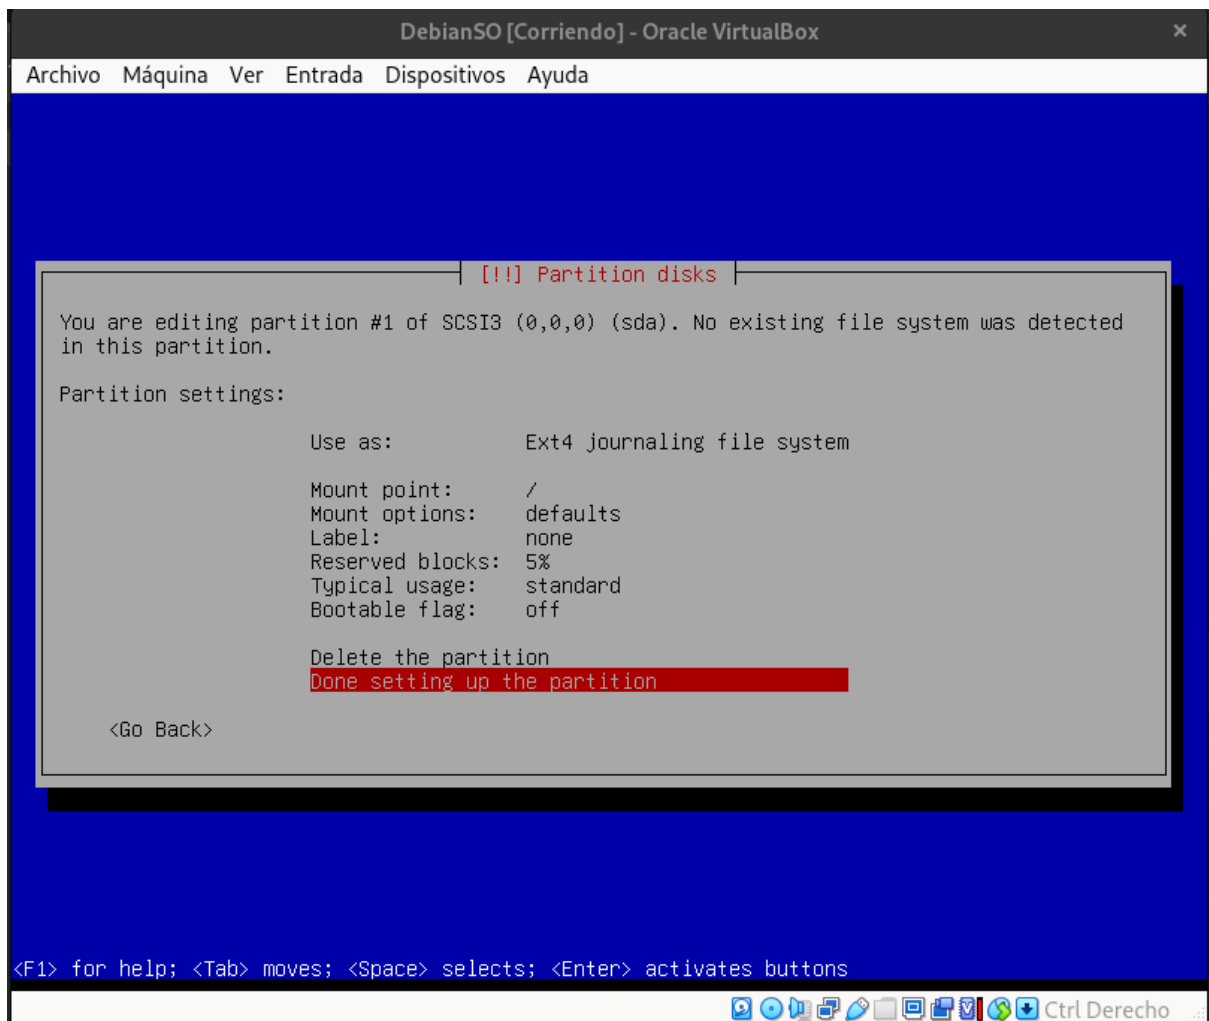

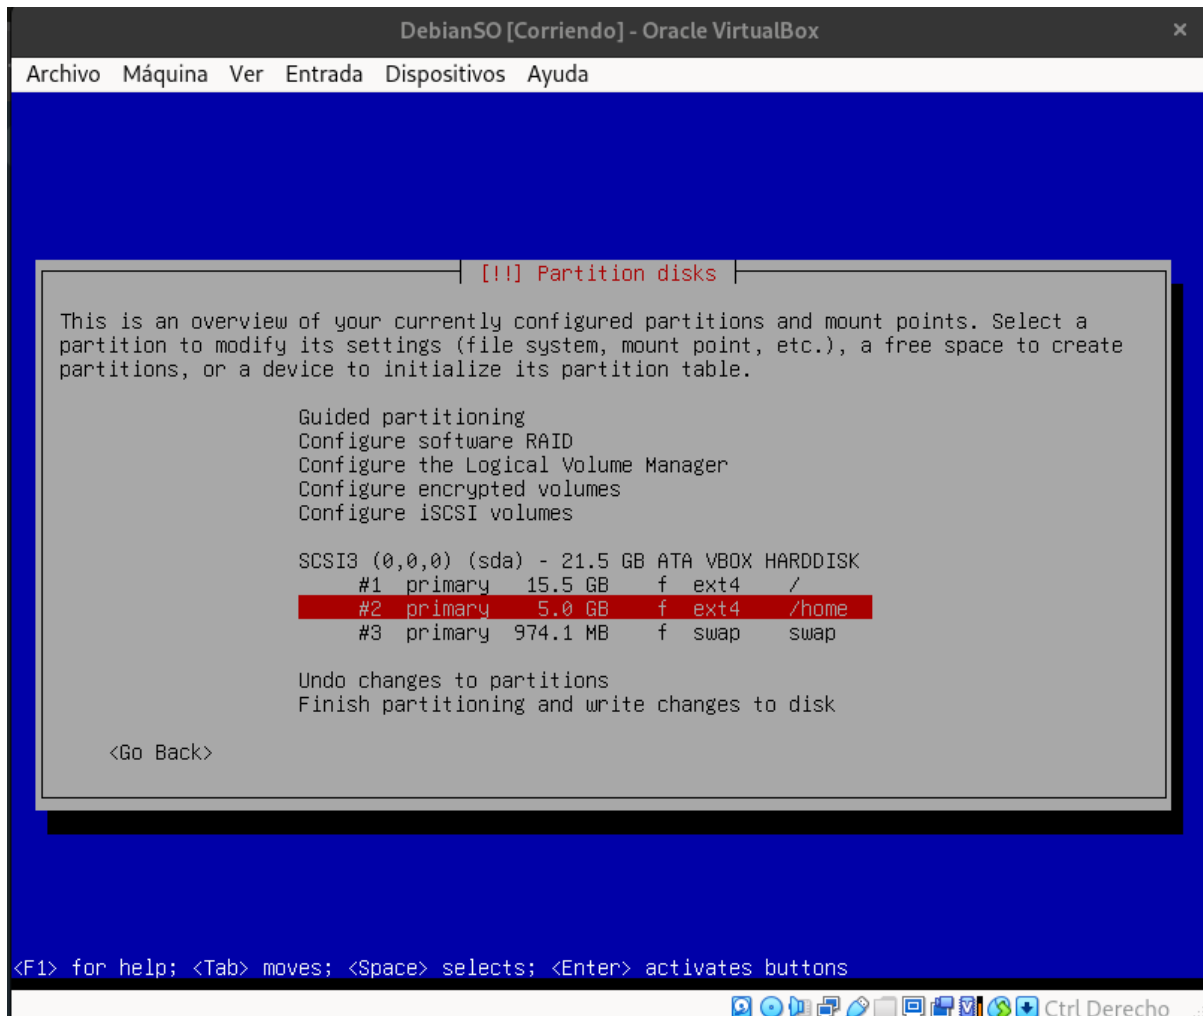

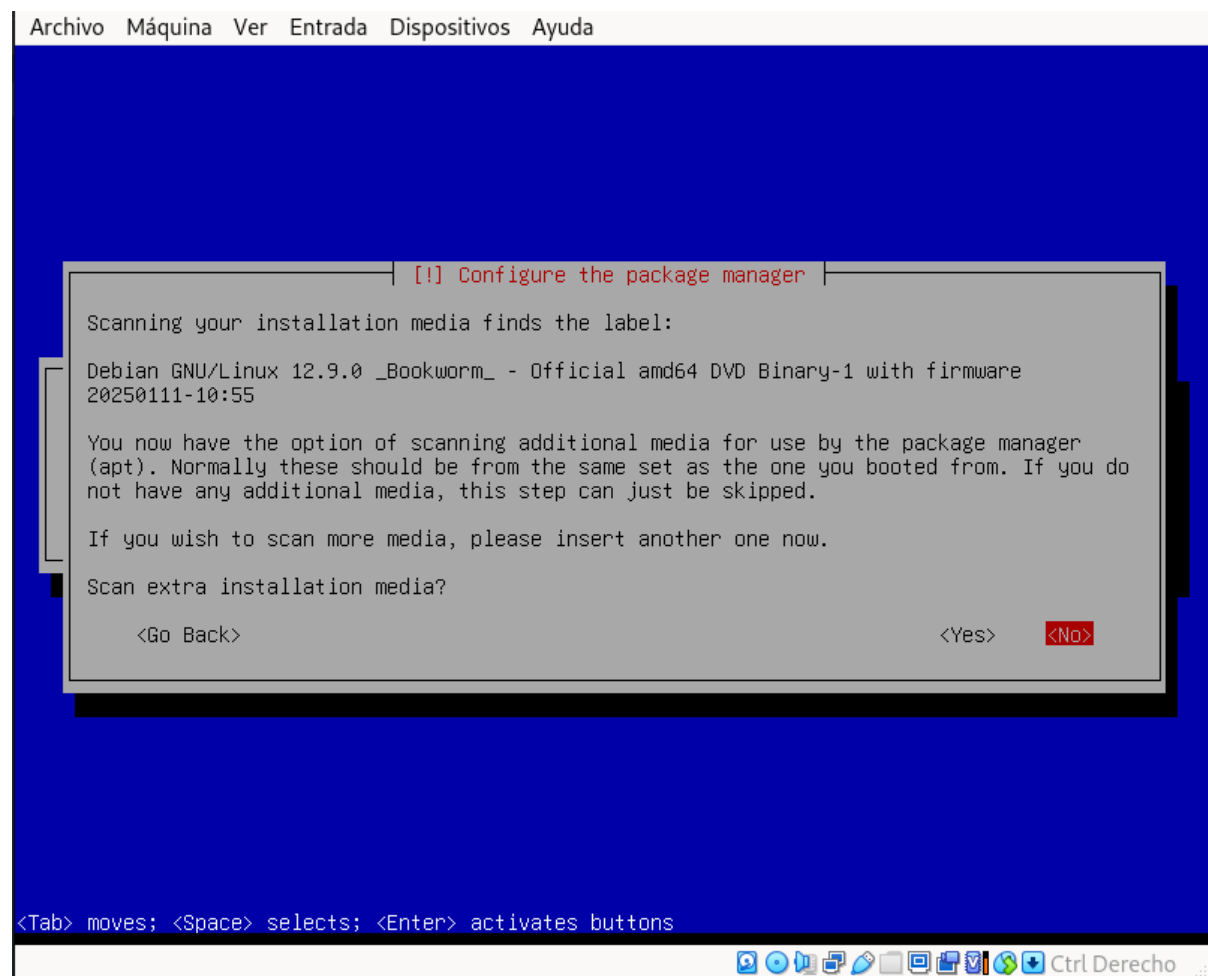

Esta imagen es la que requiere un análisis importante (Note el sistema de archivos utilizado por Linux ext4 y la swap que es la memoria de intercambio, el equivalente a los archivos de paginación de windows)

Paso 15 - Opciones de repositorios (Todos NO)

[!] Configure the package manager

A network mirror can be used to supplement the software that is included on the installation media. This may also make newer versions of software available.

You are installing from a DVD image. Even though it contains a large selection of packages, some may be missing. If you have a reasonably good Internet connection, use of a mirror is suggested if you plan to install a graphical desktop environment.

Use a network mirror?

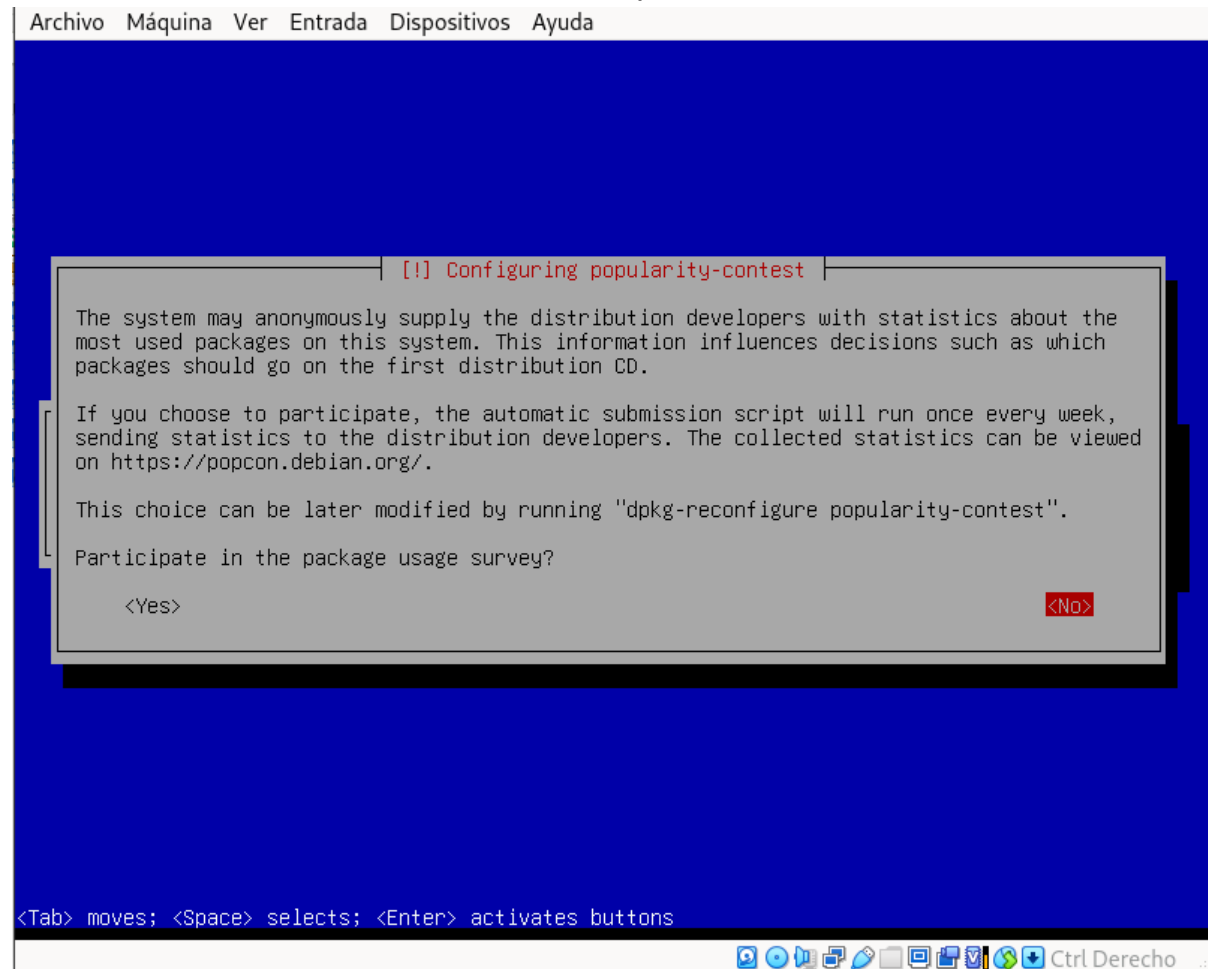

<Go Back>

<Yes>

<No>

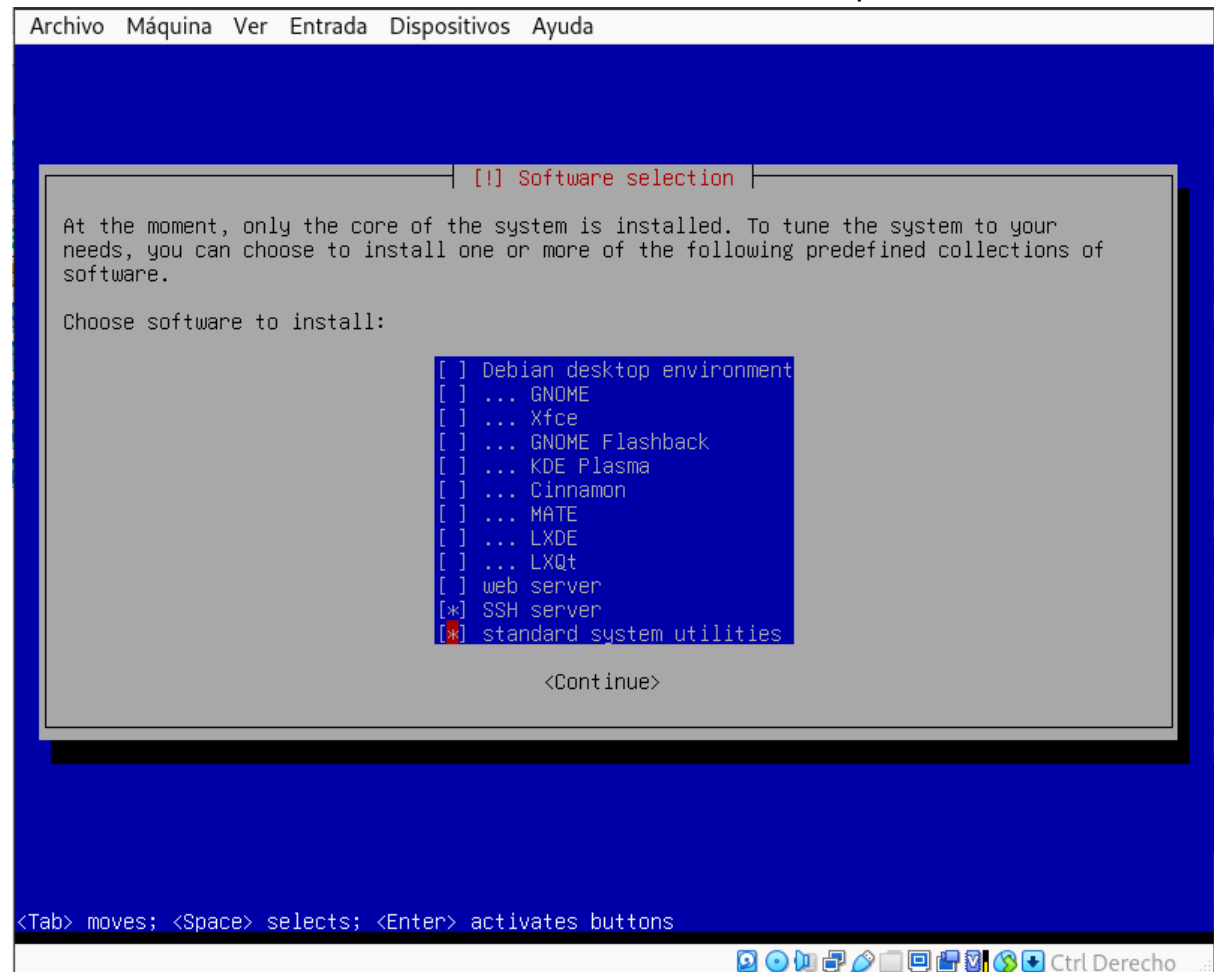

<Tab> moves; <Space> selects; <Enter> activates buttons

Paso 16 - Informe de uso del sistema operativo (NO)

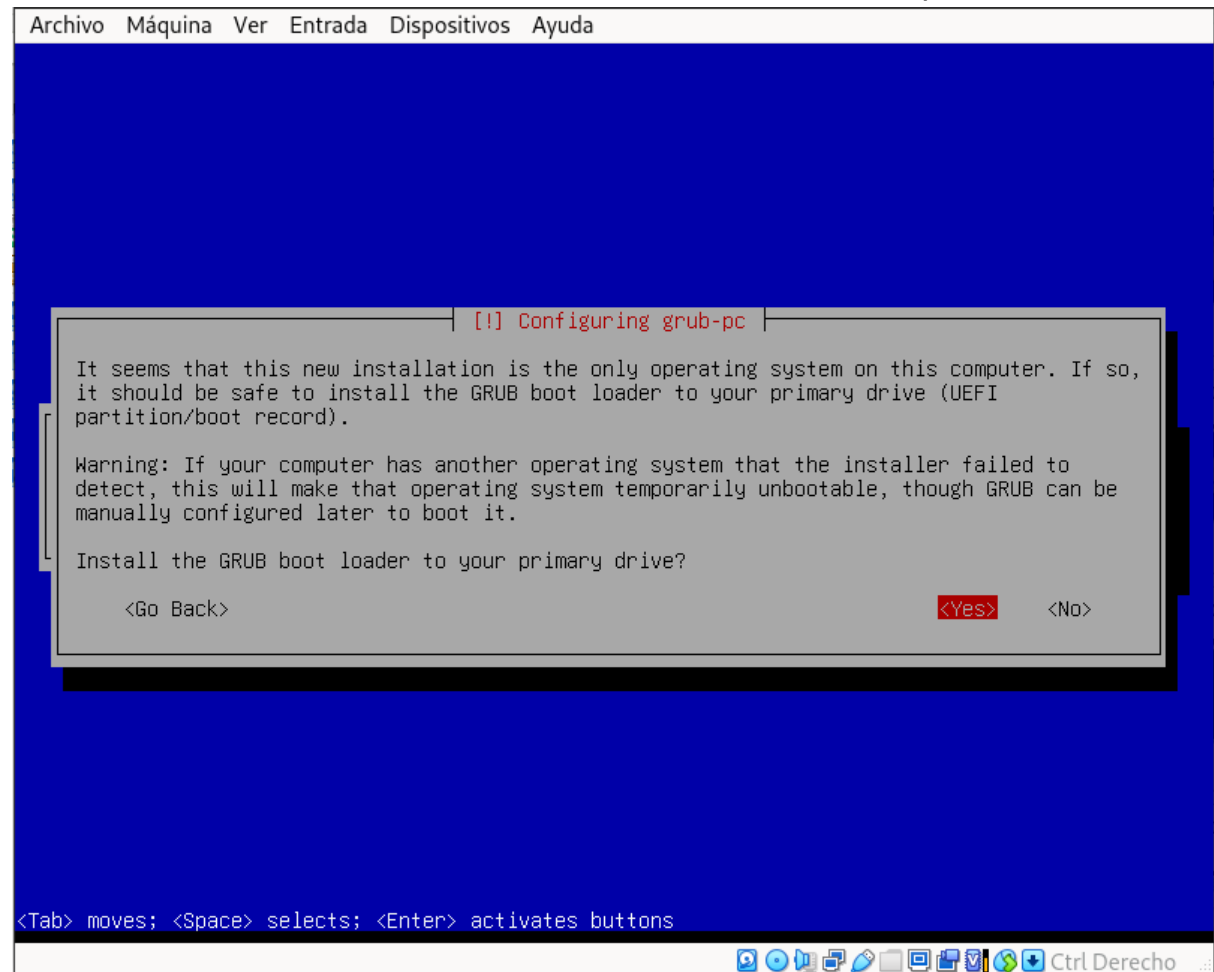

Paso 17 - Paquetes a instalar

Aquí se muestran los requeridos, si lo desea puede instalar el entorno de escritorio (Para cambiar la selección usar la barra espaciadora NO ENTER)

Paso 18 - Instalación de Grub (Inicializador del sistema operativo)

[!] Configuring grub-pc

You need to make the newly installed system bootable, by installing the GRUB boot loader on a bootable device. The usual way to do this is to install GRUB to your primary drive (UEFI partition/boot record). You may instead install GRUB to a different drive (or partition), or to removable media.

Device for boot loader installation:

Enter device manually

/dev/sda (ata-VBOX_HARDDISK_VBebe609ed-066dccb3)

<Go Back>

<Tab> moves; <Space> selects; <Enter> activates buttons

[!!] Finish the installation

Installation complete

Installation is complete, so it is time to boot into your new system. Make sure to remove the installation media, so that you boot into the new system rather than restarting the installation.

Please choose <Continue> to reboot.

<Go Back>

<Continue>

<Tab> moves; <Space> selects; <Enter> activates buttons
