LISTENING MODULE B

FUNCTIONS:

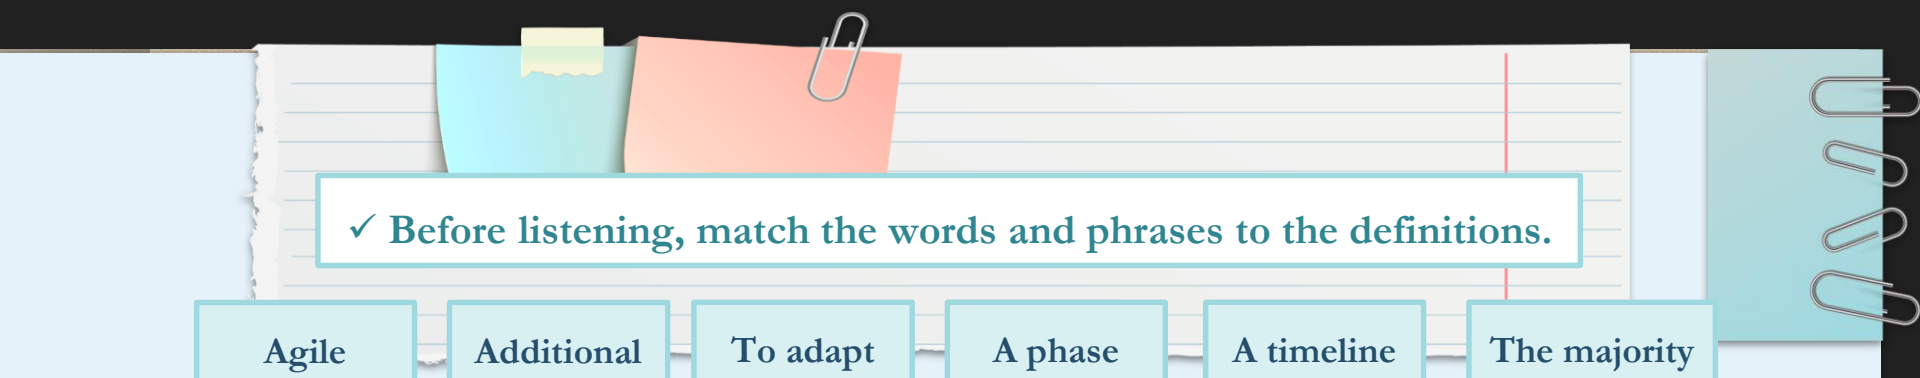

- Listening for details.
- Listening to people making decisions at work.
- Watching a video about AI.

Listening 1

Making a decision

✓ Before listening, match the words and phrases to the definitions.

Agile

Additional

To adapt

A phase

A timeline

The majority

A. A plan for when things will happen and how long they will take

B. One of the stages of a process

C. Able to move quickly and easily

D. Most of the people in a group

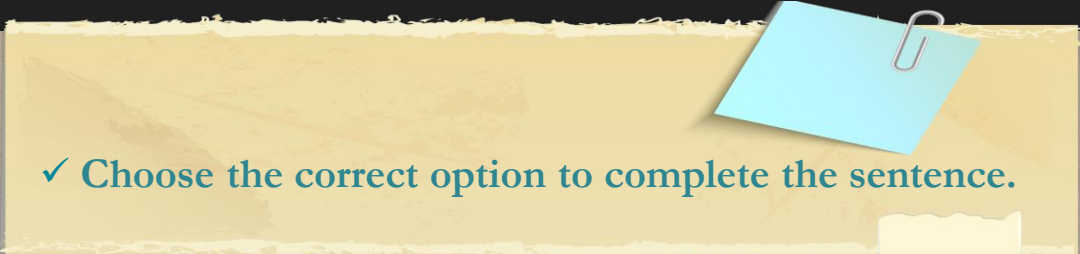

E. Something that is extra or more than planned

F. To change something to make it better or more successful

✓ Listen to a business meeting in which colleagues make a decision.

Listening 1

✓ Choose the correct option to complete the sentence.

The objective of the meeting is to ...

- ☐ decide on the role of each team member.
- ☐ agree when each phase of the project will happen.
- ☐ improve team communication.

Emiko wants ...

- ☐ to be told what to do.
- ☐ everyone to make a decision together.
- ☐ to check the decision with the head office.

David ...

- ☐ prefers a structured approach.
- ☐ is happy to take a flexible and agile approach.
- ☐ agrees with the decision they make in the end.

Carolina doesn't say much at first because ...

- ☐ she doesn't have a specific opinion on the topic.
- ☐ she is worrying about something else.
- ☐ she is considering people's suggestions.

The decision they take is based on ...

- ☐ a vote.
- ☐ a recommendation from Jani's boss.
- ☐ a majority decision to follow the team leader.

David suggests they should ...

- ☐ allow some extra time later in the project.
- ☐ get help from another team.
- ☐ use an online project management tool.

✓ Put these expressions in the correct group.

It would be best to...

I don't think I agree with you.

That's right.

I agree with you on that point.

I think we should...

How do you feel?

I'm sorry, I don't think so.

What do you think?

Asking for opinion

Giving opinion

Agreeing

Disagreeing

AI

Listening 2

✓ Match the words and phrases to the definitions.

1 artificial intelligence

2 machine learning

3 awareness

4 deep learning

5 algorithm

a technology that makes machines smart and able to think like humans.

b a type of artificial intelligence where computers learn from data.

c a set of rules for solving a problem step by step.

d knowing what is happening around you.

e teaching computers to learn and make decisions without being programmed.

✓ Watch the video:
“We’re already using
AI more than we
realize”.

artificial intelligence

perceive our worlds

machine learning and deep learning

gap exists in awareness of AI

1. Interactions with technology involve _____.
2. AI systems _____, support decisions, and mimic our abilities
3. Many everyday activities are made possible by _____.
4. Pew survey showed Americans struggle to identify AI usage in _____.
5. A _____ due to broad use of the term.
6. _____ are key methods in AI development.
7. Improvements in computing power and data generation have led to new _____.

✓ Read the statements and choose the correct option.

1. According to the video, which of the following is NOT a way that artificial intelligence is being used in everyday life?
- a. Unlocking phones using facial recognition.
 - b. Determining which political ads we see.
 - c. Transcribing speech in voice assistants.
 - d. Manually coding rules for spam email detection.

2. The video suggests that the term “artificial intelligence” has become a broad “kitchen sink” term that refers to:
- a. Specific disciplines like computer vision and natural language processing.
 - b. Only the most advanced AI systems like self-driving cars and stable diffusion.
 - c. A wide range of technologies, from machine learning to deep learning.
 - d. Exclusively the goal of recreating human-level intelligence in computers.

3. What is the main reason the video cites for the gap between people's awareness of AI and their actual interactions with it?

- a. People don't understand the technical details of how AI works.
- b. AI has become so ubiquitous that it blends into the background.
- c. The term "artificial intelligence" is confusing and misleading.
- d. AI is still an emerging technology that most people haven't experienced.

4. The video suggests that increased awareness of AI is important because it allows people to:

- a. Develop a deeper appreciation for the capabilities of AI.
- b. Participate in conversations about ethical uses of AI.
- c. Understand how AI is impacting their everyday lives.
- d. All of the above.

5. According to the video, which factor is most strongly correlated with higher awareness and understanding of AI?

- a. Age.
- b. Income level
- c. Formal education.
- d. Occupation.

6. The video suggests that as people become more aware of AI, their attitudes towards it tend to:

- a. Become more positive and excited.
- b. Become more cautious and concerned.
- c. Remain relatively stable and unchanged.
- d. Vary depending on the specific applications of AI.

7. The video indicates that the Pew survey found that Americans correctly identified the use of AI in everyday technologies about:

- a. 30% of the time.
- b. 45% of the time.
- c. 60% of the time.
- d. 90% of the time.
